

Aerospace Safety

Solutions to help enhance production efficiency, reduce costs, and meet compliance

Justrite Safety Group is a family of leading industrial safety companies, offering a comprehensive range of workplace safety solutions.

- 1** Safety Cabinets
- 2** Ergonomic Floor Matting
- 3** Cable Protectors
- 4** Aviation Wheel Chocks
- 5** Secondary Spill Containment
- 6** Oily Waste Cans & Drum Lids
- 7** Emergency Shower & Eye wash
- 8** Safety Identification – signage, floor marking tape, barricades, & more

Other essential items not pictured:

- Plunger Cans & Bench Cans
- Drum Funnel & Accessories
- Aerosol Recycling
- Gas Cylinder Storage & Handling

Workplace Safety Essentials

Safety Cabinets

Compliant, fire-resistant safety cabinets safely store flammable fuels, solvents, and chemicals. Use blue hazardous material cabinets to store acids, bases, or corrosive chemicals; or yellow cabinets to store flammables. Available freestanding or tabletop style for use at workstations.

Emergency Showers & Eye Washes

Provide flushing for dirt, dust, and chemical exposure. Locate within 10 seconds or 55 feet from a hazard, as required by ANSI.

Ergonomic Matting

Anti-fatigue matting with ergonomic features keeps workers safe and productive. Use ESD matting to protect equipment from static discharge.

Cable Protectors

Protect valuable electrical cables and hoses from damage, while providing a method of safe passage for pedestrian and vehicle traffic.

Wheel Chocks

Keep aircraft from moving while at rest. Will not crack or splinter like wood and will not create FOD (Foreign object damage). High-visibility chocks are made of durable urethane, resistant to many chemicals, oils, and solvents.

Oily Waste Cans & Drum Lids

Fight spontaneous combustion from oil-soaked rags. Use near wipe down and cleaning operations for immediate storage of oily rags and wipes.

Don't forget these important safety products:

- **Plunger Cans & Bench Cans** – using solvents
- **Secondary Spill Containment** – manage spills
- **Drum Funnel & Accessories** – safe liquid disposal
- **Aerosol Recycling** – recycle spent aerosol cans
- **Safety Identification Products** – 5S organization
- **Gas Cylinder Storage & Handling** – safely handle LPG cylinders
