

Safety Solutions for Temporary Parking Lots

Temporary shouldn't mean unsafe.

Unpaved jobsite access roads and makeshift gravel parking lots can become hazardous fast. Poor visibility, unclear traffic patterns, and unstable surfaces create real risks for workers, vehicles, and equipment.

Checkers Safety provides rugged, reliable solutions built for the demands of construction sites. As contractors clear and grade land for jobsite access, temporary parking lots made of gravel or rock often lack the structure and safety controls of permanent lots.

Whether you're managing subcontractors, heavy equipment, or daily crew traffic, our solutions bring order and safety to unpaved, high-traffic areas.

1 Bollards & Delineators
Bollard post covers quickly improve property appearance and extend the life of your steel or concrete bollards for minimal costs.

2 Signage
Surface-printed prismatic sheeting, withstands extreme temperatures and outdoor environments. Provides extra visibility during low-light and nighttime conditions when light shines on the surface

3 Parking Stops
Parking stops replace unsightly, concrete parking stops and will not chip or crack. They are maintenance-free and can easily be installed by one person.

4 Speed Humps
Constructed from 100% recycled tires, the flexible design conforms to the contour of virtually any road surface. Pre-drilled holes make it simple to install on both asphalt and concrete.

5 Warning Whips
Warning whips are ideal for identifying heavy equipment, and also make great markers for points of interest or caution.

6 Wheel Chocks
Wheel chocks for ground vehicles are manufactured with highly durable, lightweight polyurethane. These chocks are ideal for use with over-the-road trucks, trailers, pickups, and utility vehicles.

Your Jobsite Parking Safety Lineup

Parking Stops

- Heavy-duty polyurethane or rubber construction
- Bright, high-visibility colors
- Won't crack or warp like concrete
- Simple installation and removal
- Save money with an one person install solution that lasts longer and is less expensive to ship
- Custom colors are available to accommodate unique branding needs

Speed Humps

- Modular design for flexible sizing
- Ideal for gravel lots and temporary setups
- Slows traffic and reduces accident risk
- Easy one person install for reduce setup costs
- Removable during winter for snow removal operations

Bollards & Delineators

- Durable poly or steel options
- Prevent vehicle intrusion into restricted zones
- Visual guidance for chaotic jobsite layouts
