

The background of the entire page is a composite image. The top half shows a close-up of a black, textured work boot with a brown sole, positioned as if stepping onto a mat. The bottom half shows a close-up of the matting itself, which has a dark blue/black surface with a pattern of raised, yellow, oval-shaped bumps.

Élevate Your Movement

Industrial Anti-Fatigue Matting

- Increase Safety & Comfort
- Boost Productivity
- Reduce Absenteeism

Prolonged Standing Causes Discomfort and MSDs

Standing for extended periods is a common workplace requirement. However, prolonged standing on hard surfaces without proper support can lead to significant physical strain and health issues, negatively affecting both employees and employers.

Musculoskeletal Disorders (MSDs) and Discomfort

According to the U.S. Bureau of Labor Statistics (BLS), musculoskeletal disorders (MSDs) account for approximately **30%** of all workplace injuries.

Prolonged standing without ergonomic support is a major contributor to MSDs which affect muscles, tendons, and joints, leading to pain and discomfort in the lower back, legs, and feet. **Research shows that 60-70% of workers who stand for long hours report discomfort in these areas.**

"It is estimated that MSD-related injuries account for \$20 billion annually in direct operational costs alone."

Slips, Trips and Falls

Around 32% of work related accidents are caused by slips and falls every year. This makes it one of the most common types of workplace accident representing a significant occupational hazard across many industries that requires ongoing attention to prevention and safety measures. Worker injuries could result in absenteeism, decreased productivity or even liability claims.

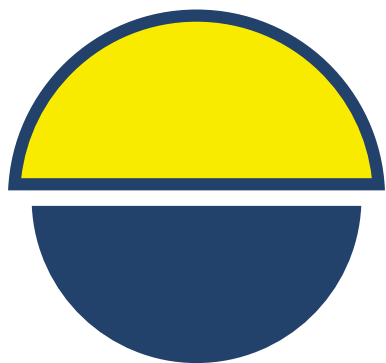

Increased Absenteeism and Reduced Productivity

Employees experiencing pain from prolonged standing are more likely to take time off work. **Studies have found that workers who suffer from pain related to musculoskeletal issues miss, on average, 2-3 more days of work per year compared to those without.**

This absenteeism not only impacts productivity but also adds to operational costs, estimated at \$20 billion annually in direct costs for MSD-related injuries alone.

"Slips, trips and falls account for around 32% of work related accidents annually."

"An anti-fatigue mat stimulates very subtle micro-movements in your muscles to keep you balanced."

Benefits of Anti-Fatigue Matting

Experts agree that matting can significantly improve productivity and employee satisfaction while reducing absenteeism and chronic illnesses related to long-term standing.

- **Tiredness and discomfort are reduced by 50%** in comparison to hard floors and the risk of slips and falls is virtually eliminated.
- **Absenteeism is reduced by 33%.** There are fewer days lost to injuries, fewer medical claims and increased compliance.
- **Productivity is maintained throughout the working day** with fatigue, pain reduced.

Scientific Support

A peer-reviewed study by Prof. Dr. Redha Taiar at the University of Reims in France illustrated that **without a mat there is a dysfunction in the balance of a person** and this is harmful because it can cause stagnation of blood circulation in the lower extremities and causes fatigue and lower limb disorders.

With an anti-fatigue mat the cushioning effect simulates continuous micro-movements minimizing blood pooling in the legs and the ergonomic design corrects the balancing of the body which reduces pains and discomfort.

Study by Prof. Dr. Redha Taiar,
University of Reims, France.

Work Safer

Prevent slips, trips and falls with NFSI-rated traction top surface and RedStop™ slip-resistant backing to prevent the mat from shifting.

Boost Productivity

Reduce absenteeism and increase stamina by minimizing fatigue with the most comfortable mat for active workstations.

Build Endurance

Extra durable top surface with UniFusion™ lamination technology for long-lasting performance in high pace environments.

Reduce Footprint

Made of durable and long-lasting materials which helps to reduce waste and is fully recyclable at end of life.

Notrax offers the widest range of anti-fatigue mats providing solutions for oily areas, welding, ESD, and many more.

Comfort that works as hard as you do.

Work Safer

Slip resistance R10 according to DIN51130 and BG-rule BGR181.

Tested and certified by the National Floor Safety Institute (NFSI).

Bevelled edges to minimize risk of tripping.

RedStop™ slip resistant backing prevents mats from shifting.

Fire classification Bfl-S1 according to EN 13501-1.

Yellow borders along sides comply with OSHA code 1910-144.

Boost Productivity

Diamond plate pattern provides traction allows easy twist turns.

Ergonomic benefit derived from a thick worker platform.

Versatile matting solution in both static and dynamic working positions.

Build Endurance

Long-wearing laminated top surface for maximum durability.

Comfortable insulation from hard floors and vibrations.

UniFusion™ laminated technology to resist the harshest work environments.

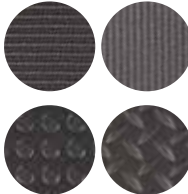

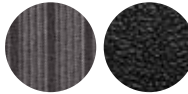

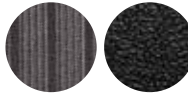

Protective layer of Dyna-Shield™ extends service life by 50%.

Reduce Footprint

Long lifetime reduces waste.

Fully recyclable.

Need help?

The Notrax team of experts is here to help you find the best matting solution for your needs.

From conducting a workspace audit and taking measurements to designing custom mats, our team is ready to handle installation and assembly across Europe.

Justrite Safety Group

Mats for Professional Use
