

Electric Vehicle Safety Solutions

Solutions that help enhance production efficiency, reduce costs, and meet compliance

Justrite Safety Group is a family of leading industrial safety companies, offering a comprehensive range of electric vehicle safety solutions.

1 Spill Containment

4 Gas Cylinder Rack

7 Plunger Can

10 Safety Drum Pumps

2 Emergency Shower & Eye Wash

5 Floor Mats

8 Oily Waste Can

11 Floor Marking Tape

3 Safety Cabinet

6 Shadow Board

9 Signage

12 Drum Funnel

Workplace Safety Essentials

Safety Cabinets

OSHA compliant, fire-resistant safety cabinets safely store flammable, hazardous and corrosive materials. Use red safety cabinets to safely store paints during cleaning and finishing.

Shadow Boards

Support 5S and create a clearly identified place for tools used on the production line to reduce clutter, accidents, and costs. Custom boards available.

Oily Waste Cans

Immediately dispose of soiled rags after the cleaning process, as required by OSHA. The self-closing oily waste can deprives soaked rags of air to prevent spontaneous combustion.

Spill Containment

Spill incidents are a common occurrence and can cost thousands in clean up and time delays. Avoid fines from water contamination and prevent slips and falls from accidental spills and leaks.

Emergency Shower and Eye Wash

Provide emergency response in the event of a chemical exposure or flushing for dirt and dust. To ensure compliance with ANSI, locate emergency equipment within an unobstructed 10-sec or 55-ft walk from where hazards may occur.

Anti-Fatigue Matting

Walking up and down the production line for 8+ hours a day can be tough on joints. Anti-fatigue matting with ergonomic features keeps workers safe and productive. Long run and workstation options available.

Don't forget these important safety products:

- **Plunger Cans** – for dispensing solvent onto wipes
- **Safety Drum Pumps** – for storing and dispensing liquids
- **Drum Funnel** – for vapor free liquid disposal
- **ESD Matting** – for electrical panel safety
- **Wheel Chocks** – for stopping movement
- **Gas Cylinder Cages** – for welding
- **Floor Marking Tape** – for 5S
