

# KEEP YOUR BUILDING SAFE

Protect your warehouse and industrial facility with column protectors to ensure structural integrity and workplace safety. By absorbing impact, these protectors reduce the likelihood of accidents and prevent costly damage to equipment and workers.

Eagle Column protectors absorb collision impact, reduce maintenance costs, and enhance workplace safety. Highly recommended by OSHA, they come in bright colors for increased visibility and can prevent collisions, cut expenses, costly repairs and accidents.

# FEATURES AND BENEFITS

## DURABILITY

1

Heavy Duty blow-molded 100% high-density polyethylene (HDPE)

2

Resistant to most chemicals

3

Absorbs forklift and tow-motor impacts

## EASE OF USE

4

Lightweight for ease of transport

5

Stackable for added protection

6

Hassle-free set-up, no tools required

## SAFETY AND COMPLIANCE

7

Aids in ADA compliance, Mini – 24" height column protectors fit under fire extinguishers

8

Safety Orange, Yellow, Red, Lime Green for high visibility

9

Recommended by OSHA as an important safety precaution

## VERSATILITY

### Model 1704

4-6 in.  
(10.2-15.2 cm.)  
Column V-Profile

### Model 1706

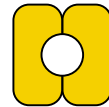

6"(15.2 cm.)  
Column

### Model 1708

8"(20.3 cm.)

### Model 1709

9"(22.9 cm.)  
Column

### Model 1710

10"(25.4 cm.)  
Column

### Model 1712

12"(30.5 cm.)  
Column

## What to Look for When Selecting a Column Protector

### Considerations

- What type of material should I look for?
- What type of testing is required in a column protector?
- What sizes and shapes are available?
- What other features should I look for?
- Will it help me be compliant with any regulations?

### Eagle Benefits

- Eagle column protectors are constructed from blow-molded 100% high-density polyethylene (HDPE) resilient to most chemicals.
- Our column protectors are tested to withstand 8500lbs of impact and temperatures of -40- 140 degrees.
- Eagle offers a broad selection of column protectors in 2 different heights, 4 hi-visibility colors, 5 different inside dimensions, and offered in round or square.
- Equipped with a key-lock feature to prevent slippage and aid in proper alignment during installation. No tools are needed for assembly.
- Our mini-column protectors can help create an ADA-compliant facility allowing handicap accessibility for other safety products such as a fire extinguisher.
