

GENERAL MANUFACTURING INDUSTRY

360-Degrees of Workplace Safety

**Protect people and property
from the front gate to the loading dock**

In manufacturing, safety is vital for protecting workers and ensuring efficiency. Understanding current safety challenges helps create safer environments, fostering innovation while prioritizing the health of the workforce. **Here are four key statistics relevant to safety in this industry:**

Workplace fatalities in the manufacturing sector have seen a troubling rise, with the U.S. Bureau of Labor Statistics reporting 5,486 workplace fatalities in 2022. This figure represents a 5.7% increase from 2021, highlighting the urgent need for enhanced safety protocols and training in manufacturing environments worldwide.

In 2022, the manufacturing industry recorded 396,800 total recordable cases of nonfatal injuries and illnesses underscoring the importance of implementing robust safety management strategies to protect workers from common hazards such as slips, trips, and falls.

More than 1 billion workers worldwide are exposed to hazardous substances, including pollutants, dusts, vapors, and fumes each year.

Improper storage of chemicals accounts for nearly 25 percent of all chemical accidents.

With a legacy of specialized brands dating back to 1894, Justrite Safety Group delivers comprehensive industrial safety solutions to protect people, property, and the planet across diverse industries. Trusted by leading global manufacturers, our innovative products ensure regulatory compliance, enhance operational efficiency, and safeguard employees—providing you with the confidence and peace of mind that your facility is fully equipped for safety.

Designing for Compliance

We never lose sight of the goal: workplace safety. We manufacture safety products to meet safety standards, working alongside relevant organizations to guide our customers towards a state of compliance.

Sharing Safety Knowledge

Our expertise is your advantage. We collect, synthesize, and distribute safety information — in easy-to-use terms — so you can take action to remain safe and compliant.

Focusing on Customer Needs

We design and manufacture every product to meet specific safety standards. By listening to our customers and staying involved in compliance committees, we're able to deliver the highest-quality safety products.

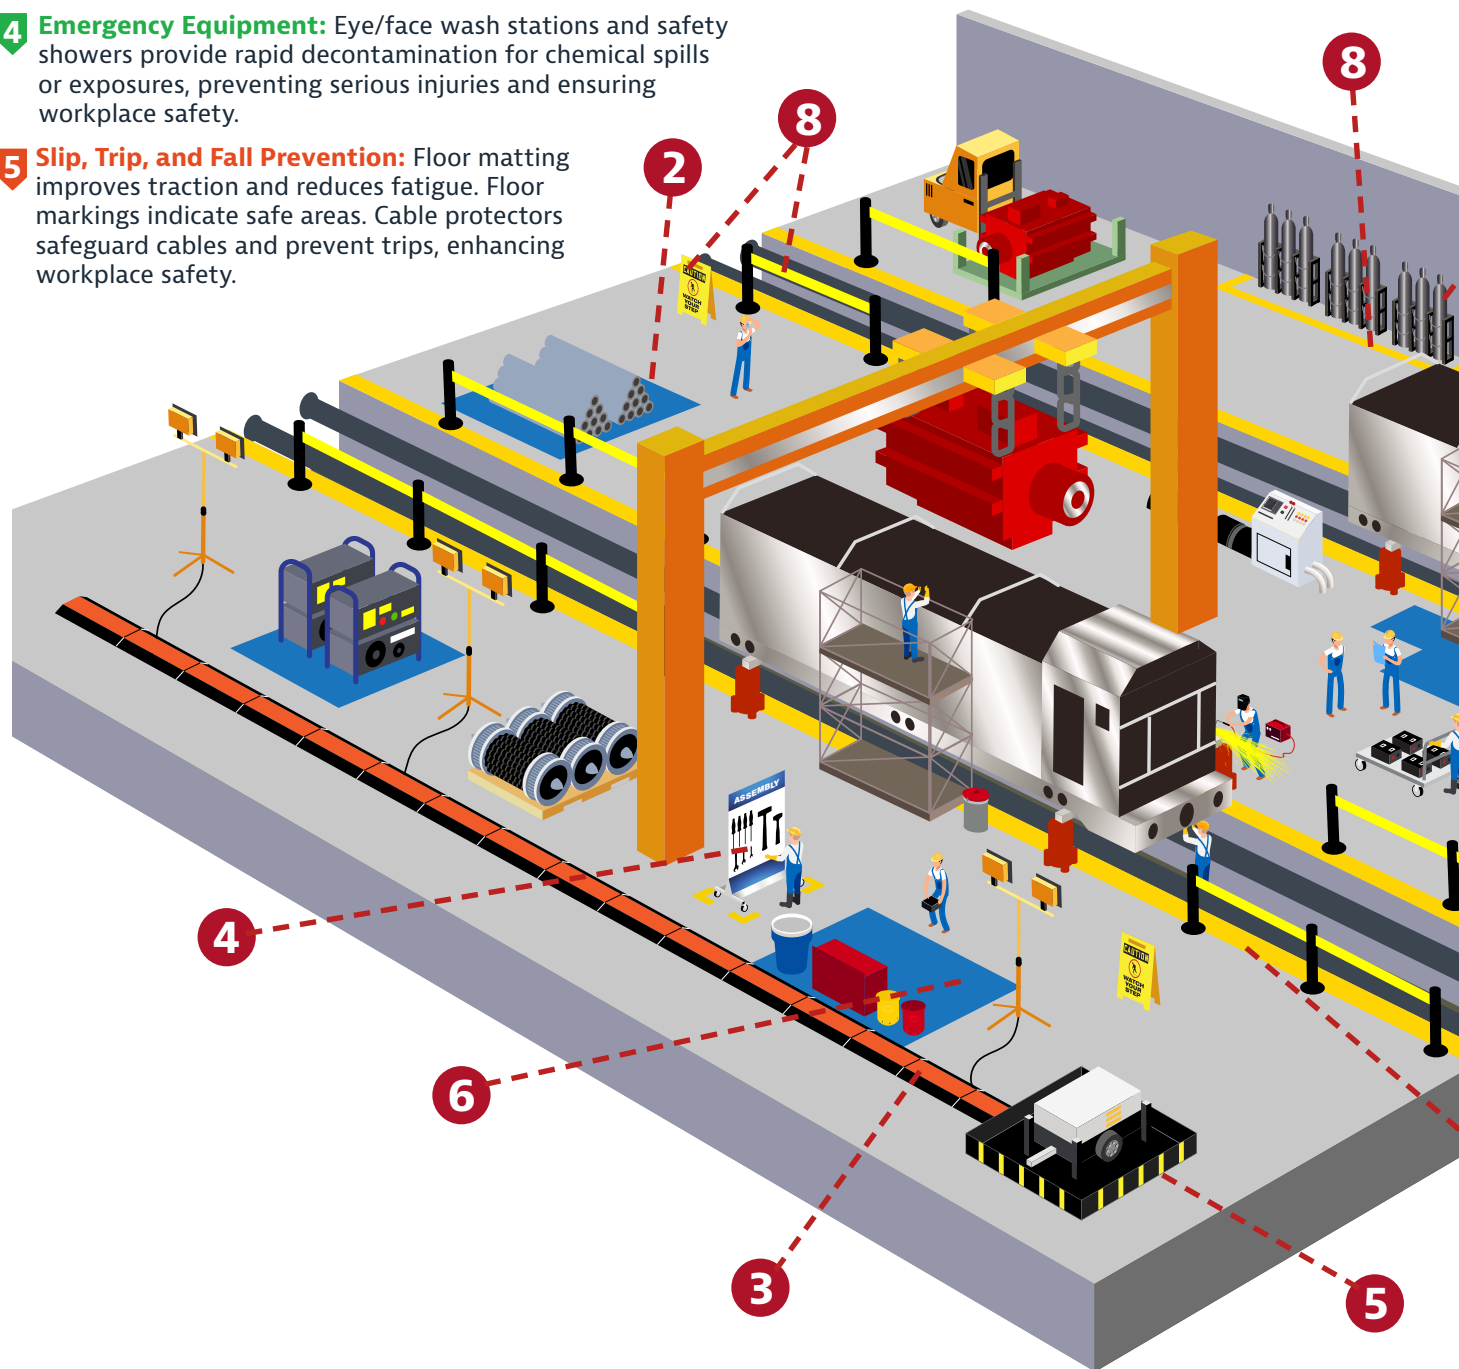

Our product solutions are specifically designed to help safety managers seamlessly integrate these principles into their operations.

Key Product Categories:

- 1 Traffic Control:** Traffic control solutions include speed bumps, parking stops, clearance bars, and bollard post sleeves to enhance safety and reduce maintenance in parking areas and roadways.
- 2 Safety Identification:** Safety signs, labels, and tags communicate hazards, directions, and safety information to workers, enhancing safety and compliance with regulations.
- 3 Chemical Control:** Safety cabinets, HPLC disposal cans, laboratory dispensing containers, and secondary containment solutions prevent spills and contamination, enhancing workplace safety and regulatory compliance.
- 4 Emergency Equipment:** Eye/face wash stations and safety showers provide rapid decontamination for chemical spills or exposures, preventing serious injuries and ensuring workplace safety.
- 5 Slip, Trip, and Fall Prevention:** Floor matting improves traction and reduces fatigue. Floor markings indicate safe areas. Cable protectors safeguard cables and prevent trips, enhancing workplace safety.

By implementing these solutions, you can:

- Reduce the risk of workplace accidents and injuries
- Improve compliance with regulatory standards.
- Reduce fire risks associated with improper storage of chemicals and flammable materials
- Minimize costly incidents and operational disruptions
- Enhance workplace ergonomics, minimize worker fatigue, and significantly reduce slip, trip, and fall hazards.

Incorporating solutions that follow regulatory and compliance standards helps to ensure a safe and efficient environment in the food and beverage industry.

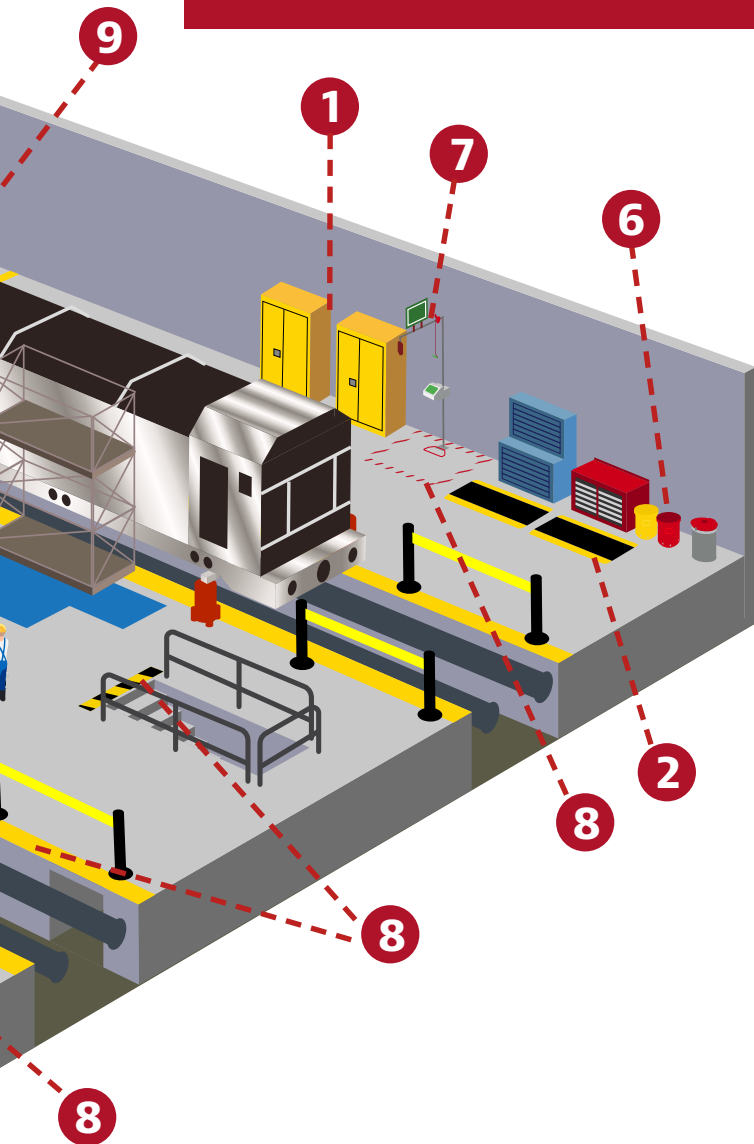

Current Good Manufacturing Practices (CGMP)

Hazard Analysis and Critical Control Points (HACCP)

Spill Containment & Countermeasures (SPCC)

American National Safety Institute (ANSI)

Occupational Safety and Health Association (OSHA)

- 1 Safety Cabinet**
Securely stores flammable or hazardous materials, preventing accidents.
- 2 Floor Matting**
Improves traction, reduces fatigue, and prevents slips and falls.
- 3 Cable Protectors**
Cable protectors prevent trips, protect cables, and ensure a safe manufacturing area.
- 4 Shadow Board**
Shadow boards support 5S by organizing tools, eliminating clutter, and improving efficiency.
- 5 Secondary Spill Containment**
Secondary spill containment prevents hazardous spills, protects workers, and ensures environmental safety.
- 6 Oily Waste Cans & Drum Lids**
Safely contains and disposes of flammable rags and materials.
- 7 Emergency Shower & Eye Wash**
Emergency showers and eye washes provide immediate decontamination to protect workers from chemical exposure.
- 8 Floor Marking**
Floor markings highlight hazardous areas, mark emergency exits, and define pedestrian walkways, reducing the risk of accidents and injuries.
- 9 Gas Cylinder Storage & Handling**
Organizes gas cylinders, ensures safety, and prevents leaks.

Front Gate

Establish your safety culture starting at the front gate with Justrite Safety Group products related to traffic control, gates, and safety reporting.

Signal Safety Scoreboards

Promote safety in a big way at entry points with traffic signal style safe-day scoreboards from Accuform. Draw attention to recent incidents, or track accident-free safe days.

Traffic & Parking Control Signs

Guide people as they approach your facility day or night with bold reflective signs. Keep traffic moving safely to entrances, exits and parking areas.

Gate Signs

Alert drivers to important gate operation information and safety concerns with sturdy signs that stand up to outdoor conditions.

Speed Bumps

Speed bumps and humps alert drivers to potentially hazardous areas and guide drivers to a safe and controlled speed. Checkers™ durable bumps and humps outlast concrete and reduce maintenance needs.

Parking Lot

Support safety even before people reach your building. Use Justrite products to create a safe, welcoming, and easy-to use parking area.

Parking Signs

Sturdy, reflective parking signs that withstand the elements ensure your parking information remains clear and visible day or night. Use them to mark designated parking and no parking areas..

Visitor Signs

Easy-to-read visitor signs provide directions for guests. Managing visitors helps you control access, makes employees accountable for their visitors, and improves security.

Parking Stops

Solid plastic parking stops do not chip or crack like concrete. They keep your parking area looking good without painting or maintenance. Checkers™ recycled plastic parking stops are built to withstand abuse from gas, oil, salt, sunlight, and chemicals.

Parking Lot

Clearance Bars

Clearance Bars reduce structural and vehicle damage by providing an early warning for motorists. The clearance bars are constructed of high-visibility yellow polyethylene that demands driver attention.

Bollard Post Sleeves

Eagle HDPE Bollard Post Sleeves make old bollards look like new. They easily slide over existing NPT pipe and eliminate the need for maintenance, while helping to protect vehicles and the post from impact damage.

Outdoor Ashtrays

Keep your property free of unsightly cigarette butts and enhance your business image with Justrite® Outdoor Ashtrays. Self-extinguishing design safely collects cigarette butts and reduces the risk of fire.

Front Office

Welcome people to your business and provide a safe environment for visitors and employees. Justrite has what you need to create a good impression - and reduce liability concerns.

Entrance Signs

Marking your entrances with clear, attractive, weather-resistant signage helps visitors quickly find their desired destination. Entrance signs can also keep people away from restricted areas.

Entrance Mats

Make a good first impression with attractive entrance mats that show visitors your company cares about safety. NoTrax® entrance mats are designed to remove dirt and moisture from shoes to reduce slip hazards and keep entrances clean.

Fastlane Drop-Over Cable Protectors

When cables must cross traffic areas, cable protectors reduce tripping and traffic hazards while protecting the cables underneath. Checkers™ Fastlane® Lightweight Drop-Over Cable Protectors are made from durable polyurethane with a low profile and can be connected to any length.

Workstations

Employees work safely and more efficiently in clean, organized workstations - and Justrite has the necessary tools.

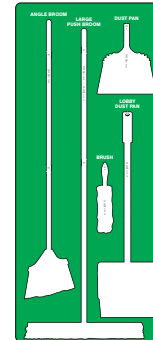

Equipment Signs

Machine safety hazards are everywhere, from pinch points to electrical hazards. AccuformNMC has the OSHA- and ANSI-compliant signs and labels you need to address a wide variety of equipment hazards, from automatic starting to machine guards, and more.

5S Tool Shadow Boards

5S Shadow Boards eliminate clutter and improve organization, making it easy to identify which tools have gone missing from their designated area. Choose wall-mount, mobile or custom boards in a variety of colors and materials to meet your specific needs.

Lockout/Tagout Devices and Tags

Prevent serious injury or death while equipment is being set up or serviced by using lockout/tagout devices. Select from a wide range of lockout devices to suit most any need, and keep workers safe.

Safety Cans

Utilizing Type I, Type II, D.O.T., disposal, plunger, dispensing, bench, and rinse safety cans significantly enhances workplace safety. These specialized containers are designed to minimize the risk of fire, spills, and chemical exposure, ensuring compliance with safety regulations.

Modular Matting

Modular matting from NoTrax® offers anti-fatigue and floor protection in virtually any configuration to designate workspaces for a variety of uses from welding/hot spark areas to wet or oily production spaces.

Workstation Mats

Improve worker health and safety by improving traction and reducing fatigue with workstation mats. NoTrax® workstation mats are engineered to meet tough industrial applications in wet or dry areas, including multi-shift operations and assembly lines.

Sound Barriers

Combat noise pollution and protect workers with Temporary QuietSite™ Noise Barriers. These barriers absorb and reflect sound, reducing perceived noise levels (dBA) by up to 50%, creating a safer, more comfortable work environment that enhances productivity and worker well-being.

Lithium Cabinet

Proper storage of lithium-ion batteries is crucial for preventing fires and ensuring safety in the workplace. Justrite's lithium-ion battery charging and storage safety cabinet features ChargeGuard™ for maximum protection. With multiple layers of shielding, it effectively reduces the risk of battery fires and thermal runaway, making it ideal for charging and temporarily storing lithium-ion batteries.

Safety Cabinets for Small Spaces

Safe storage of flammables protects your workers and your facility. Storing flammables safely near their point of use protects productivity. Transportable, compact, and countertop cabinet options from Justrite are ideal solutions when space is tight.

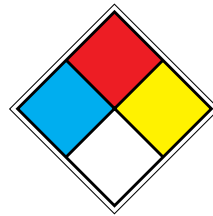

R&D Lab

Lab personnel face a variety of inherent dangers - and deserve top-quality protection. The Justrite family of brands produces industry-leading safety products you can count on to keep lab workers safe.

Hazard Communication

Hazard communication labels and signs alert workers to potential risks, and also inform first responders in case of an incident. AccuformNMC produces a variety of NFPA, GHS and other hazcom products to keep lab workers safe.

HPLC Disposal Cans

Keep laboratory and personnel safe with a compliant, environmentally-friendly solution to waste collection. Justrite HPLC waste containers are ideal for vapor and fire protection, safeguarding against accidental spills, and maximizing safety and convenience.

Laboratory Dispensing Containers

Every lab needs dispensing containers that are safe and easy to use. Justrite offers a number of containers and bottles to dispense flammable liquids and solvents safely, without waste or exposure to workers.

Safety Cabinets for Hazardous Materials

Wherever acids, bases, oxidizers, or toxic materials are used, safe storage is critical to protect personnel and property. Justrite safety cabinets are the ideal solution for hazardous material storage.

Sani-Flex™ Anti-Fatigue Mat

Mats that provide comfort and an anti-slip surface give an extra layer of safety for lab workers. The unique design of Sani-Flex™ anti-fatigue matting offers quality and durability, as well as oil/grease and chemical resistance.

Laboratory Carboys and Solvent Waste Systems

Use Justrite's® Laboratory Carboy and Solvent Waste Systems for the storage and dispensing of solvents, buffers, reagents and powders. Excellent chemical compatibility, interchangeable caps and adapters, and ergonomic design.

Biohazard Containers

Biohazard containers are essential for the safe, temporary storage of biological waste, contaminated materials, and other regulated waste (excluding sharps). These containers ensure compliance with safety regulations, protect workers from exposure, and maintain a clean and safe working environment.

Factory Floor

Protecting people, material, machinery, and production requires a solid safety plan - and a solid safety supplier. Justrite brands deliver the safety products you need to keep your floor running smoothly.

Custom OSHA & ANSI Safety Signs

Your production areas have unique safety needs, and that sometimes requires unique safety messaging. We've made it easy to create custom OSHA and ANSI safety signs with your own exact messages.

Floor Signs & Tapes

Production workers need safe spaces to work, but forklifts sometimes need to operate in the same area. The solution is Tough-Mark™ heavy-duty floor tape and signs to clearly indicate lanes, aisles, and designated work areas.

Eyewash & Safety Showers

Chemical splashes and spills demand immediate action. Providing eyewashes and safety showers is not just important, it's required to protect your workers. Hughes products should be your first line of defense.

Oily Waste Cans

Rags and cloths soaked with solvents, thinners, linseed oil, combustible adhesives, and other flammable liquids present a serious fire risk when improperly discarded. Use Justrite® Oily Waste Cans to safely dispose of oil-soaked rags. Liner bags available.

Column Protectors

Protecting your equipment and facilities is no small task. Column protectors from Eagle wrap around columns, posts and beams to absorb impact from tow motors and fork trucks, minimizing damage and injuries.

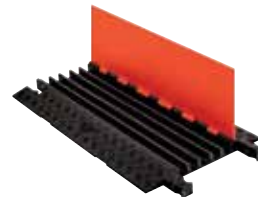

Bollard Posts

Protect your facility from damage or keep vehicles safely away from workers with bollard posts. Maintenance-free poly bollard posts are a low-cost safety solution from Eagle.

Guard Dog® Cable Protectors

Reduce tripping hazards and provide a safe cable crossing for vehicles and pedestrians while protecting valuable cables and hose lines. Guard Dog cable protectors are available in ADA compliant and low-profile versions.

Runner Matting

Provide extra traction and protect industrial flooring near machines with floor runner matting from NoTrax®. Adhesive backing holds tight, but peels up easily when needed.

Spill Control

Spills can impact your facility and the environment. Justrite spill control products help you meet SPCC and EPA regulations. Options include collapsible berms and structured spill containment items.

Storage Area

Hazardous materials may be out-of-sight, but safety can never be out-of-mind. Justrite Safety Group offers the solutions you need to ensure your storage areas don't become hazard areas.

Chemical Signs and Labels

When your operation uses or produces hazardous chemicals, appropriate safety signs and labels to alert workers are essential, and legally mandatory. AccuformNMC offers the top-quality signs and labels you need for chemical safety.

Plastic Drums

Safe storage, handling, and transportation of materials requires durable that resist chemicals but handle easily. Eagle plastic drums are ideal for hazardous and non-hazardous materials, spill containment and cleanup, spill kit containers, and biowaste disposal and incineration.

Drum Accessories

Spills from chemical or hazardous material drums can easily create safety emergencies including fires and explosions. Justrite drum accessories are specifically designed to safeguard against incidents. Equipment includes FM-approved drum faucets and vents, funnels, tip-over protection, and more.

Gas Cylinder Storage Equipment

Gas cylinders must be handled with special care to avoid potential incidents and injuries. Justrite cylinder storage racks, stands, pallets, cages, and hand trucks minimize your risk for accidents when transporting and storing gases.

Aerosolv® Aerosol Recycling Systems

Aerosol cans offer convenience, but also require special care for environmentally responsible disposal. Safely and legally dispose of and recycle aerosol cans with Aerosolv®, the original aerosol can disposal system.

Safety Cabinets

Fire codes and safety regulations aren't just recommendations. They are required to protect your workers. Justrite® Safety Cabinets meet codes and regulations to safely store flammable liquids, corrosives, pesticides, and other hazardous materials.

Structured Drum Spill Containment Pallets & Platform Systems

Secondary containment systems for spill control make safety sense. You can create a customized spill-control system with Justrite's EPA-compliant spill containment pallets, accumulation centers, and caddies.

Loading Dock

Workers and vehicles face multiple hazards in loading docks. Safety tools from the Justrite Safety Group help you turn this high-hazard area into a high-safety zone.

U.S. Chemical Storage DynaLoc® LTC Safety Case

DynaLoc®LTC mitigates the risks of transporting DDR (damaged, defective, or recalled) lithium-ion batteries. Each box is made of lightweight aluminum with secure latches and fireproof gaskets. The DynaLoc LTC safely contains thermal runaway events, featuring a filter to reduce smoke and gas, and a proprietary interior coating to isolate and transport batteries during a fire event.

Door Signs

In a bustling loading dock, using the wrong door could spell disaster. Mark your dock-area doors with easy-to-read door signs to keep everyone away from harm.

Shipping & Packaging Labels

Shipping labels ensure safe handling of packages and communicate hazardous information about package contents. AccuformNMC labeling options include flammable, fragile, lithium batteries, and many more.

Ramps

Sturdy ramps allow workers to safely move heavy loads over curbs and steps or load and unload trucks. High density polyethylene ramps are a convenient solution when using hand trucks and dollies.

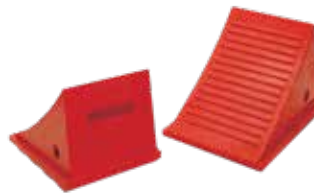

Dock Plates

Dock plates help provide a safe way to work around docks. For use with two- and four-wheeled dollies, hand trucks or carts, these lightweight, ergonomic design dock plates help reduce injuries.

Wheel Chocks

Safely chocking wheels greatly improves safety as vehicles are loaded or unloaded. Checkers™ offers a variety of wheel chock sizes and styles for a wide range of ground equipment, commercial, and military vehicles.

Wheel Chock Signs

Require drivers to chock their wheels while vehicles are at rest to prevent unexpected movement that could injure workers or damage your facility. Bold, weather-resistant wheel chock signs will make your dock a safer place.

Outdoor / Rear of Building

Materials stored outside require special considerations. Justrite Safety Group has the solutions you need to safely increase your storage capacity.

Aluminum Cylinder Lockers

Cylinder lockers provide safety and security for gas cylinders. These no-rust lockers are ideal for liquid propane gas and compressed gas cylinders, forklift fuel, and more.

Outdoor Safety Locker

Compliant, durable, weatherproof outdoor lockers provide safe and secure storage for hazardous materials, chemicals, and waste.

Berms

Leak-prone containers and equipment require dependable spill control to comply with EPA regulations. Berms from Justrite are the secondary containment solution you need.

IBC Spill Containment

Leaking intermediate bulk containers might be more than simple spill control can handle. Reliable leakproof sumps from Justrite exceed regulations to protect against high-volume spills. EPA compliant.

Heavy-Duty Cable Protectors

Heavy vehicles outside your building can easily damage unprotected lines and cables, resulting in safety hazards. The robust Linebacker® and Yellow Jacket® cable protector series from Checkers™ provide a safe crossing while protecting valuable cables and reducing trip hazards.

Parking Safety

Every facility with a parking area needs parking safety tools to protect infrastructure, vehicles, and people. Improve lot safety and appearance with parking curbs, speed bumps, speed humps, corner guards, and wall guards.

Surveillance Signs

Let visitors and trespassers know they're being watched with security camera signs and video surveillance labels. Prominent surveillance signs discourage unwanted visitors and illegal activities to keep your facility secure.

Hi-Viz General Purpose Wheel Chocks

Introducing Hi-Viz General Purpose Wheel Chocks with SafeRay™ Technology that fluoresce under UV light, providing up to 50% more reflectivity than competitors, reducing accidents and boosting operational efficiency. Each load rating is backed by extensive testing, ensuring their reliability on an 8% grade.

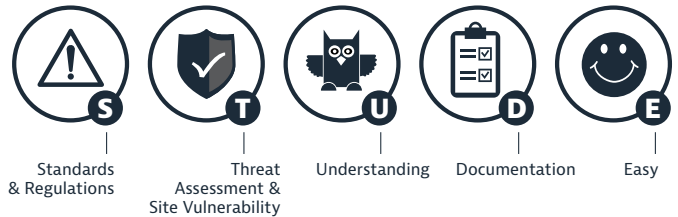

Justrite® 45 Gallon Outdoor Flammable Storage Cabinet

The Justrite 45 Gallon Outdoor Flammable Storage Cabinet with manual close doors safely stores hazardous materials outdoors. Constructed with Galvanneal 18 Gauge Steel, it offers corrosion resistance, a rain-diverting slanted roof, stable trapezoid legs, and features like stainless steel hinges, a secure locking system, forklift-friendly skids, and rainwater protection. This cabinet is FM Approved for safety.

STUD-E™

The Ultimate Workplace Safety Survey

What is STUD-E™?

Keeping workers safe is much more than PPE – it starts with recognizing potential risks and hazards. The Justrite® STUD-E™ Workplace Safety Survey assists in creating and maintaining a safe workplace by identifying vulnerabilities and risks.

Using our *proprietary, custom-built app* designed by safety engineering experts, STUD-E™ covers three general areas:

1 Identify Hazards

- Storing and transferring flammable liquids
- Slips, trips, and falls
- Spill control and containment
- Machinery and equipment
- Hazardous material management
- Hazardous waste storage areas
- Emergency safety equipment
- Extreme temperatures
- Noise
- Signage
- Hygiene and sanitation

2 Assess Risk

- Determine sources and processes causing risk
- Evaluate existing control measures
- Actions needed to control the risk
- Severity level
- Urgency of the risk
- Prioritization of risks

3 Control

- Help eliminate or minimize risk
- Substitute hazard with safer alternative
- Recommend engineering controls
- Administrative controls
- 5S Lean
- Process improvement

Cost Savings

STUD-E™ prioritizes critical safety issues while helping to balance the bottom line.

- ✓ Preventing compliance violations from OSHA and EPA
- ✓ Avoiding costly fines
- ✓ Preventing workers comp claims
- ✓ Lowering insurance premiums
- ✓ Enhancing process improvements

Put our expertise to work and improve your overall safety program

Global Leader in Industrial Safety

Proudly Offered By:

Justrite Safety Group is a leading global manufacturer and supplier of a deep portfolio of complementary mission-critical safety products which simplify workplace safety and regulatory compliance to protect lives, assets, and the environment.

Manufacturing sites face unique safety and compliance challenges. We consistently enhance our range of portable, durable, and self-contained products to address these challenges and uphold safety compliance standards. Our products offer distinct solutions for manufacturing environments, weather exposure, and extreme conditions.
