

CONSTRUCTION INDUSTRY

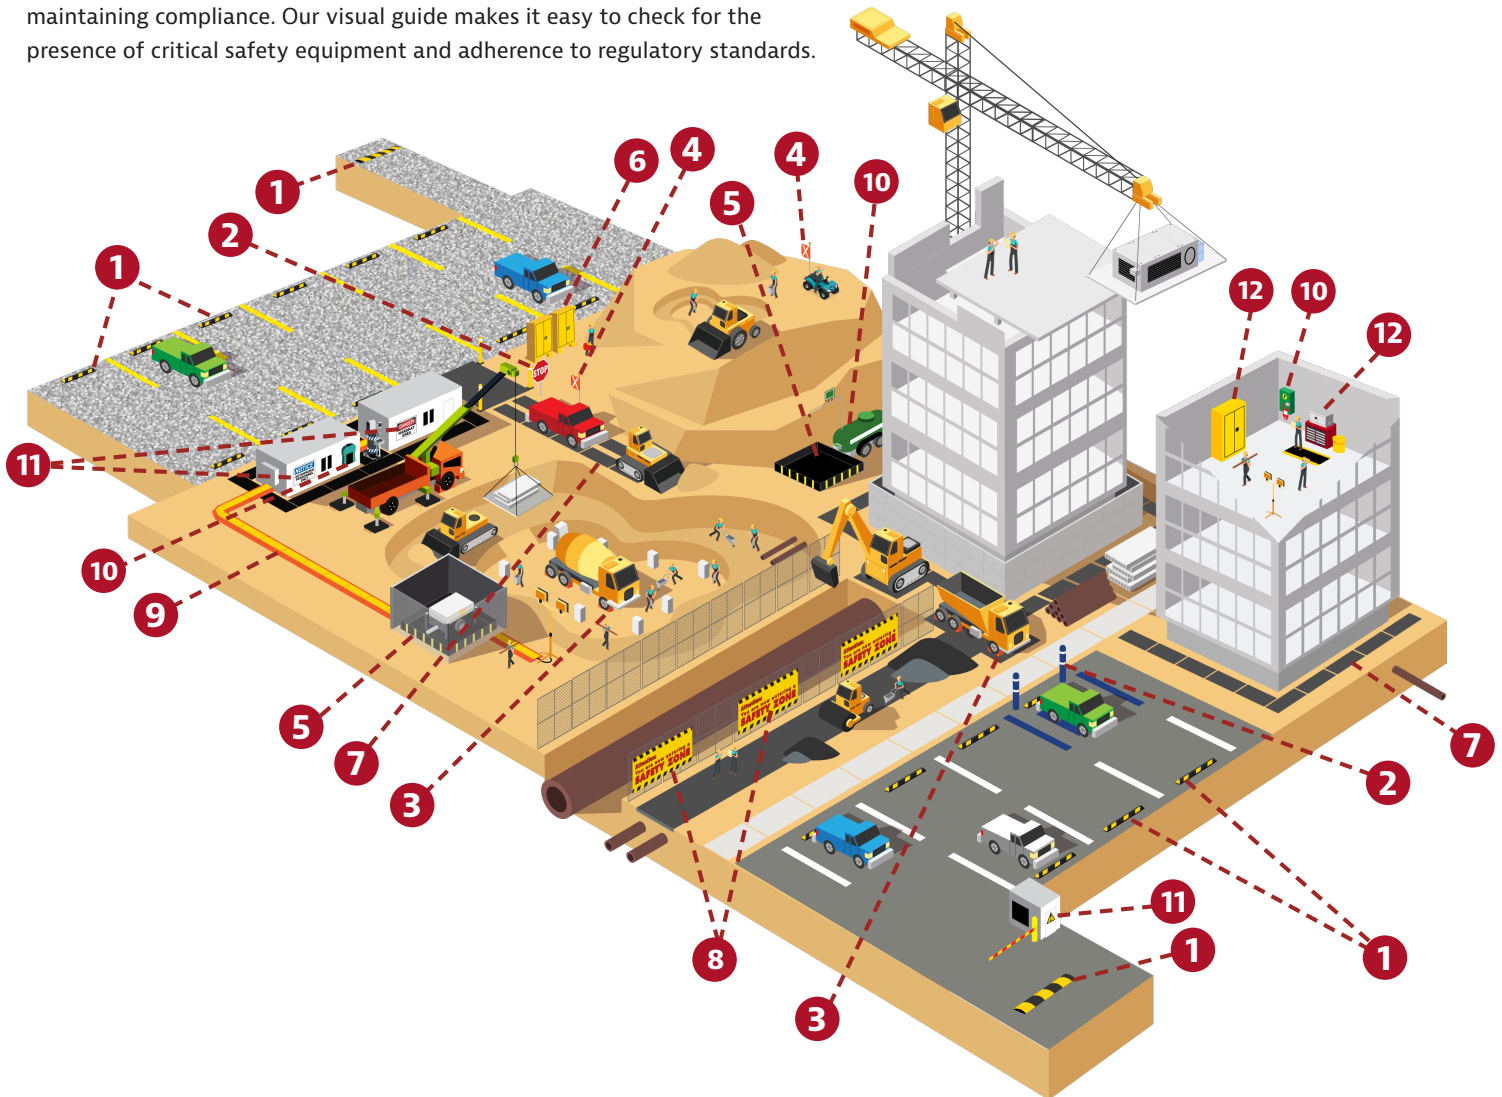

volume 1.0

**Comprehensive Safety Solutions
for Every Stage of Construction**

Construction Site Safety Map

Ensuring construction site safety is crucial for protecting workers and maintaining compliance. Our visual guide makes it easy to check for the presence of critical safety equipment and adherence to regulatory standards.

- | | | |
|--|--|--|
| <p>1 Parking Stops and Speed Bumps
Traffic control devices enhancing safety in construction site parking areas.</p> <p>2 Bollards
Robust steel barriers protecting buildings and pedestrians from vehicle impacts in high-traffic areas.</p> <p>3 Wheel Chocks
Prevent vehicle roll-aways on inclines, enhancing site safety with durable, lightweight design.</p> <p>4 Warning Whips
Ensure high visibility and reliability for vehicles or equipment in any condition.</p> | <p>5 Spill Containment Berms
Flexible barriers that contain spills, protecting the environment and ensuring regulatory compliance.</p> <p>6 Outdoor Flammable Cabinets
Weatherproof storage for hazardous materials, enhancing site safety and meeting OSHA standards.</p> <p>7 Ground Protection Mat
Durable mats supporting heavy loads, creating stable pathways over uneven or muddy terrain.</p> <p>8 Fence Wrap
Customizable barrier fabric enhancing privacy, safety, and branding on construction site perimeters.</p> | <p>9 Cable Protectors
Durable ramps shielding electrical cables from damage, supporting up to 34,000 lbs per axle of equipment.</p> <p>10 Emergency Shower & Eye Wash
Portable decontamination stations for rapid response to chemical exposures on-site.</p> <p>11 Safety Signs
High-visibility signage communicating hazards, directions, and safety information to workers.</p> <p>12 Safety Cabinets
Securely stores flammable or hazardous materials, preventing accidents.</p> |
|--|--|--|

FIRE SAFETY

Store fuels and flammables safely—Both OSHA and NFPA 30 require the use of approved storage cabinets for quantities over 25 gallons of flammable or combustible liquids kept in a room or indoor area. Justrite cabinets meet these standards and last up to three times longer than many competitors, lowering replacement costs.

Flammable Safety Cabinets

Fire-resistant cabinets designed for secure storage of flammable liquids in workspaces. Comply with OSHA, NFPA 30, and IFC (self-closing models).

Outdoor Flammable Safety Cabinets

Weather-resistant, secure storage for flammable liquids. Ideal for outdoor use. Comply with OSHA, NFPA 30, and IFC (self-closing models).

Paint Safety Cabinets

Secure, fire-resistant storage for paint and other Class III combustibles. Comply with OSHA, NFPA 30, and IFC (self-closing models).

Lithium-Ion Battery Charging Cabinet

Most lithium-ion battery fires happen during charging. The Justrite cabinet features a 9-layer ChargeGuard™ system, pressure relief vent, double-wall insulation, and a filtration system to help reduce risk and contain hazards.

While regulatory codes do not mandate the specific color for a safety flammable cabinet, industry has customarily observed certain colors for defined liquids.

Yellow for flammable liquids	Green for pesticides and insecticides
Red for paints, inks, and other combustible liquids	Silver or neutral colors for laboratory settings
Blue for corrosives and hazardous liquids	White, beige or gray for waste or outdoor lockers

Safety Cans and Containers

When working with flammable or combustible liquids, using the wrong fluid could result in equipment damage or lead to disaster. Storing fuels and flammable chemicals in different colored safety cans help identify, organize, and segregate liquids.

OSHA requires flammables with a flash point below 80°F (27C) be in a red can with yellow band. Typical industry convention is:

Red for Gasoline **Yellow for Diesel** **Green for Oil** **Blue for Kerosene**

SECONDARY SPILL CONTAINMENT

Engineered to contain leaks and spills from tanks, generators, or equipment, these berms provide best-in-class protection—preventing hazardous liquids from contaminating soil or water and ensuring full regulatory compliance. Their seamless, leakproof construction enables rapid deployment and delivers unmatched durability compared to standard options.

Rigid-Lock QuickBerm®

One-piece containment berm meets EPA requirements and controls leaks from drums, vehicles, and tankers. No assembly needed — ideal for quick, drive-in/drive-out use (not for long-term storage). Deploys in minutes for emergency spill response.

Product Description	SKU	CA Prop 65
Justrite 10' x 10' x 12", 745 gal, Drive Over Berm	28519	⚠
Justrite 6' x 8' x 12", 355 gal, Drive Over Berm	28516	⚠
