

ENTERTAINMENT INDUSTRY

**Protecting People and Assets
in Entertainment Venues**

In the entertainment industry, safety is paramount for protecting performers, crew members, and audiences while ensuring successful productions and events. Understanding current safety challenges helps create safer environments while prioritizing the well-being of all involved. **Here are six key statistics relevant to safety in this industry:**

- Over a decade, 300 outdoor concerts led to 70,000 injuries and 232 deaths, emphasizing the need for **better safety and crowd management.**
- In 2023, Live Nation hosted 50,000 events for 145 million fans, highlighting the scale and risks of **live entertainment.**
- In 2023/24, approximately 12 children per day were treated in U.S. emergency rooms for **amusement ride-related injuries.**
- **Slips, trips, and falls** are common in entertainment due to slippery surfaces, uneven floors, and cluttered walkways.
- **Electrical hazards** from lighting, sound, and effects can cause shocks, burns, or fires due to faulty wiring and improper handling.
- From 2002 to 2024, 32 deaths occurred on **film sets**, with 22 of these (69%) directly on set, 9 in theaters, and 1 in distribution.

The entertainment industry thrives on unforgettable experiences, but behind every concert, film set, theme park, or live event is a responsibility to ensure safety. With thousands of injuries occurring each year in entertainment venues, the need for proactive safety solutions has never been greater. Justrite Safety Group is committed to addressing these challenges through innovative products and industry expertise.

Ensuring Compliance with Safety Standards: We understand safety in entertainment begins with compliance. From fire prevention to hazardous material storage, Justrite Safety Group provides industry-leading safety solutions that meet strict regulatory standards. Our products help entertainment venues, production crews, and event organizers reduce risks and stay compliant with evolving safety requirements.

Providing Expert Safety Knowledge: Knowledge is power when it comes to preventing accidents. Justrite Safety Group offers training, safety guidelines, and best practices for venue operators, stage crews, and event planners. Whether it's managing electrical hazards, implementing proper crowd control, or ensuring safe handling of production equipment, we provide the resources needed to create a secure environment.

Tailoring Solutions for Unique Entertainment Risks: Every entertainment venue has its own safety challenges. Concerts deal with crowd surges, film sets require proper fire safety, and theme parks must prevent slips, trips, and falls. By understanding these diverse risks, Justrite Safety Group delivers tailored solutions, from spill containment systems to fire-resistant storage and workplace safety gear—helping venues stay prepared for any situation.

At Justrite Safety Group, we believe that safety should never take a backseat to entertainment. By prioritizing compliance, education, and innovative solutions, we help protect the people who bring entertainment to life.

Our product solutions are specifically designed to help safety managers seamlessly integrate these principles into their operations.

Key Product Categories:

- 1 Storage and Organization:** Shadow boards, floor mats, and storage containers help maintain a clutter-free environment backstage, in prop storage areas, or at event venues. This reduces the risk of accidents and improves efficiency during setup and teardown.
- 2 Motion Safety:** Bollard covers, parking stops, and wheel chocks enhance safety in parking lots and backstage areas by preventing vehicle movement and reducing the risk of accidents during loading and unloading operations.
- 3 Ground and Turf Protection:** Ground protection mats and drivable turf protection panels stabilize and protect sensitive surfaces from heavy foot traffic and vehicle movement, ensuring safety and preventing damage in outdoor venues and event spaces.
- 4 Cable Management:** Cable protectors safeguard cables from damage and prevent tripping hazards, ensuring compliance with regulations like OSHA. They are essential in stage, backstage, and tech areas where cables are prevalent, enhancing safety and organization for performers, crew, and equipment.

By implementing the safety solutions from Justrite Safety Group, entertainment venues can address the following safety challenges:

- Slips, Trips, and Falls
- Electrical Hazards
- Crowd Management and Safety
- Fire Safety
- Vehicle Safety
- Compliance and Regulatory Risks

Implementing compliant solutions ensures a safe and efficient environment in entertainment venues.

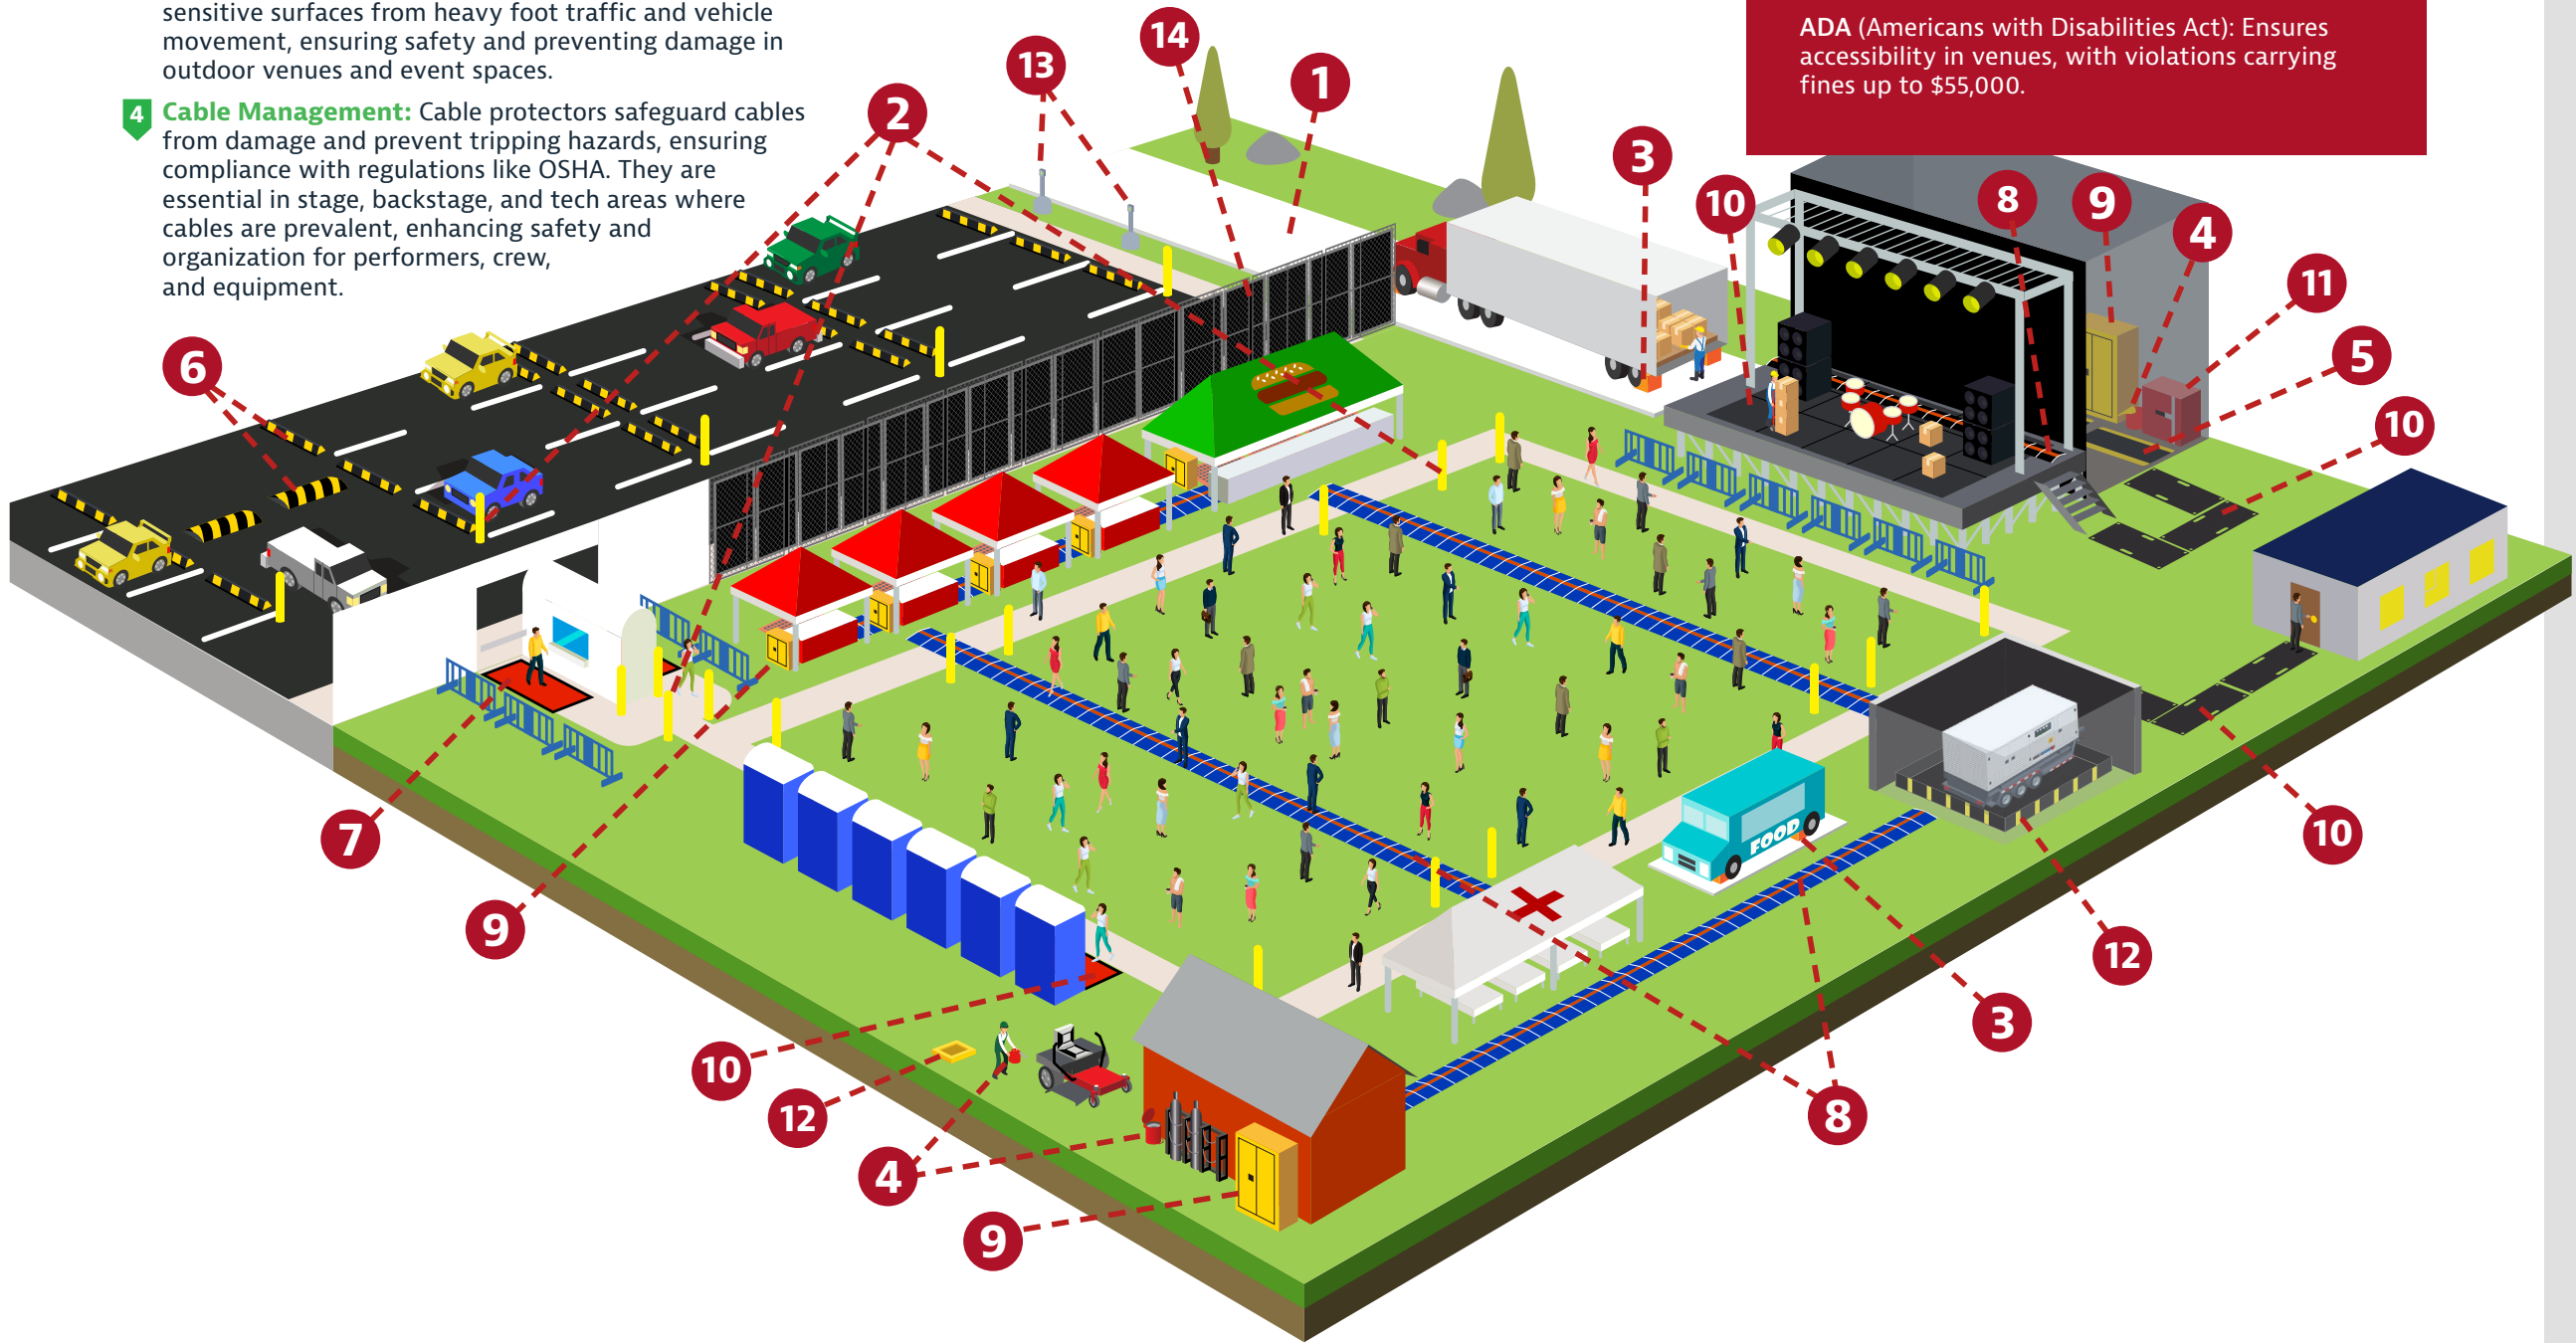

OSHA (Occupational Safety and Health Administration): Enforces workplace safety standards.

NFPA (National Fire Protection Association): Sets standards for fire safety in entertainment venues.

EPA (Environmental Protection Agency): Regulates environmental compliance, particularly for outdoor venues.

ATF (Bureau of Alcohol, Tobacco, Firearms and Explosives): Regulates storage and handling of explosives used in pyrotechnics.

ADA (Americans with Disabilities Act): Ensures accessibility in venues, with violations carrying fines up to \$55,000.

- 1 Drivable Turf Protection Panels**
Protect turf from vehicle damage, ensuring durability and stability.
- 2 Bollard Posts**
Control traffic, enhance safety, and protect areas from vehicle access.
- 3 Wheel Chocks**
Prevent vehicle roll-aways enhancing site safety with durable, lightweight design.
- 4 Safety Cans**
Safety cans securely manage flammable liquids, ensuring fire safety and OSHA/NFPA compliance.
- 5 Anti-Fatigue Mats**
Provide comfort and safety for walkways, work areas, and backstage spaces.
- 6 Parking Stops & Speed Bumps**
Parking stops define boundaries, improving pedestrian safety & parking lot organization.
- 7 Logo Entrance Mats**
Welcome guests to your event with custom-branded mats that enhance visibility and professionalism.
- 8 Cable Protectors**
Prevent damage to cables, reduce tripping hazards, and ensure OSHA compliance.
- 9 Safety Cabinets**
Securely store flammable or hazardous materials, preventing accidents.
- 10 Ground Protection Mats**
Durable mats support heavy loads, creating stable pathways over uneven or muddy terrain.
- 11 Explosive Magazines**
Adhere to ATF regulations for storage of high and low explosives used for pyrotechnics and fireworks.
- 12 Spill Containment**
Prevent spills from spreading, protecting people and the environment.
- 13 Outdoor Ashtrays**
Reduce cigarette litter and comply with regulations.
- 14 Noise Barriers**
Noise barriers reduce outdoor noise by up to 50%.

Parking & Transportation Hubs

Ensuring pedestrian and vehicle safety is crucial. Properly installed bollards reduce vehicle-pedestrian collisions by 90%. Compliance with OSHA and ADA standards prevents injuries, as over 60,000 U.S. pedestrians are injured in vehicle crashes annually.

Guide Post Delineators

Guide post delineators are used to provide clear directional guidance, enhance visibility, and improve safety by marking road curves, intersections, and hazards for drivers. Poly Guide-Post Delineators are lightweight, portable, yieldable high density polyethylene (HDPE) posts used to warn, guide and delineate.

Poly Bollard Posts

Bollard posts provide versatile safety and organizational solutions for the entertainment industry. From ensuring pedestrian safety in parking lots to maintaining orderly lines at venues and protecting will-call areas, these durable posts enhance security and streamline operations. Their adaptability makes them essential for creating safer, more efficient entertainment spaces.

Column Protectors

Column protectors safeguard parking and transportation hubs with durable, chemical-resistant HDPE construction that absorbs up to 8,500 lbs of impact. Lightweight, stackable, and tool-free, they're easy to install and available in various sizes and colors. Enhance safety, reduce costly repairs, and ensure compliance with OSHA and ADA standards—all in one solution.

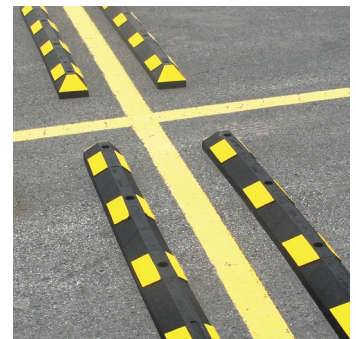

Clearance Bars

High-visibility clearance bars ensure safety and efficiency at parking and transportation hubs in the entertainment industry. Built with durable HDPE, these cost-effective bars prevent structural and vehicle damage while guiding oversized vehicles. Easy to install and maintain, they provide a reliable solution for managing traffic flow in busy environments.

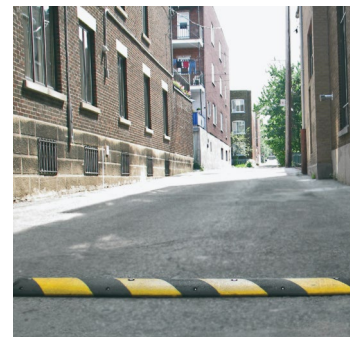

Parking Stops

Parking stops offer a reliable, cost-effective solution for parking lot safety and organization. Made from 100% recycled solid plastic, they outperform traditional concrete by resisting damage from gas, oil, salt, and sunlight. Maintenance-free and molded in solid colors, they won't chip or crack, are easy to install, and never require painting.

Speed Bumps

Designed for speed reduction, speed bumps are paramount to keep parking lots safe for both motorists and pedestrians. Speed bumps can be made of plastic or rubber. They are long lasting, easy-to-install, and environmentally friendly.

Cable Protectors

Cable protectors are important in parking and transportation hubs due to the high traffic of people and vehicles. They help prevent damage to cables and reduce tripping hazards, while ensuring compliance with regulations such as OSHA. Cable protectors are easy to install and can withstand harsh conditions, heavy vehicle/pedestrian traffic and wear and tear, lowering total cost of ownership.

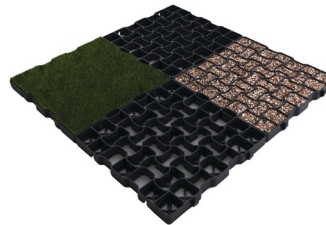

Outdoor Ashtrays

Outdoor ashtrays offer a durable, weather-resistant solution for parking and transportation areas in the entertainment industry. Its self-extinguishing design enhances fire safety, while its sleek aesthetic ensures clean, professional environments. Reduce cigarette litter, comply with regulations, and promote environmental responsibility with low-maintenance receptacles that keep public spaces safe and welcoming.

Ground Stabilization

GeoGrid® offers a sustainable, high-capacity ground reinforcement solution for parking and transportation hubs, providing stabilization while supporting heavy vehicle loads. Its durable, eco-friendly design ensures fast installation and versatility, enhancing safety and organization with customizable demarcation and aesthetic options for high-traffic areas.

Entrance & Exit Areas

Security, crowd flow, and aesthetics matter. Bollards, ashtrays, and entrance mats help prevent slips and manage debris, which can reduce maintenance costs and safety risks. Slips and falls cause 20% of workplace injuries.

Outdoor Ashtrays

Outdoor ashtrays provide a durable, fire-safe solution for cigarette disposal, reducing litter and fire risks while enhancing the cleanliness and aesthetics of outdoor spaces. Featuring self-extinguishing designs, weather-resistant materials, and easy maintenance, these ashtrays promote environmental responsibility and compliance with safety standards, making them ideal for industrial, commercial, and public settings.

Bollard Posts

Bollard posts provide versatile safety and organizational solutions for the entertainment industry. From ensuring pedestrian safety in parking lots to maintaining orderly lines at venues and protecting will-call areas, these durable posts enhance security and streamline operations. Their adaptability makes them essential for creating safer, more efficient entertainment spaces.

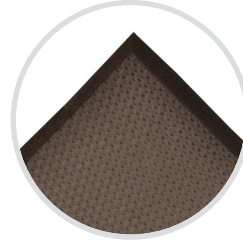

Entrance Mats

Entrance mats improve the look of your entrance and proper matting programs can keep up to 80% of debris out of the facility.

Anti-Fatigue Mats

Ticket takers and security workers often stand for long periods of time; anti-fatigue mats help keep workers comfortable, alert, and healthy.

Logo Entrance Mats

A logo mat isn't just for branding. It makes a strong first impression, traps dirt and moisture, protects floors, reduces slip hazards, and reinforces your brand from the moment guests enter.

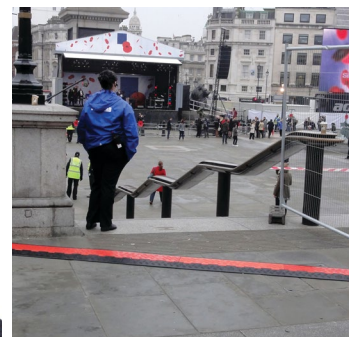

Ground Protection Matting

Ground protection mats are designed to protect surfaces from damage caused by heavy foot, equipment, and vehicle traffic, all of which are present in entrance and exit areas. Made from 100% recycled high-density polyethylene are designed to withstand heavy traffic, wear and tear. They protect surfaces and ensure safety. Easy to install and maintain, these mats are perfect for temporary pathways and event logistics, offering cost-effective, reliable protection.

Cable Protectors

Entrance and exit areas feature a high volume of cables and foot traffic, making cable protectors a must-have. They help prevent damage to cables and reduce tripping hazards, while ensuring compliance with regulations such as OSHA. Cable protectors are easy to install and can withstand harsh conditions and wear and tear, lowering total cost of ownership.

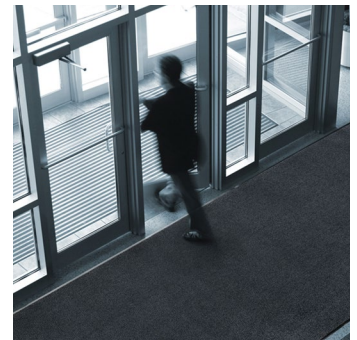

Operational Areas

Entertainment venues must address safety, compliance, and efficiency. Loading docks pose fall and crushing risks. OSHA and NFPA compliance prevents fines, while proper housekeeping, cable management, and storage enhance safety. Our solutions, including safe material storage and cable protectors, ensure compliance.

Entrance Mats

Sabre entrance mats are non-textured for drying feet and can be placed in virtually any part of the facility to provide slip/fall protection and keep the facility looking great.

Flammable Cabinets

Flammable cabinets offer the entertainment industry a reliable solution for safe storage of flammable materials. Ideal for loading docks, central control rooms, staff facilities, and storage areas, these cabinets ensure OSHA and NFPA compliance, minimize fire risks, and protect personnel and assets with durable, secure, and space-efficient designs.

Gas Cylinder Handling and Storage

Compressed gas cylinder handling and storage solutions provide the entertainment industry with OSHA- and NFPA-compliant safety when using compressed gases. Products include robust hand trucks, barricade racks, support brackets, carts and outdoor storage lockers, protecting personnel and equipment while optimizing compliance and operation efficiency in high-risk environments.

Oily Waste Cans

Oily waste cans provide a vital safety solution for the entertainment industry. Ideal for loading docks, control rooms, break rooms, and storage areas, these durable steel cans prevent fires by isolating flammable waste, limiting oxygen exposure, and ensuring compliance with safety regulations. Protect your facilities while maintaining efficiency and environmental responsibility.

Drum Storage Cabinets

Drum storage cabinets ensure safe and efficient storage of flammable materials for the entertainment industry. Ideal for loading docks, control rooms, staff facilities, complies with OSHA/NFPA standards, and optimizes space with adjustable shelves. Enhance safety, streamline operations, and safeguard your team and assets.

Lithium-Ion Cabinet

Lithium-ion battery charging cabinet offers unparalleled safety for entertainment industry control rooms, break rooms, and storage areas. With ChargeGuard™ technology, multiple protective layers, and a 4kWh capacity, it mitigates fire risks and thermal events. Its compact design, lockable doors, and easy relocation ensure secure, efficient battery management, enhancing workplace safety and operational continuity.

Wheel Chocks

Wheel chocks are a cost-effective way to prevent vehicles from moving during loading/unloading and satisfy compliance standards. They are portable and can be used with various vehicle types, including those that may not be compatible with certain dock lock systems. Wheel chocks feature lightweight designs, easy insulation, durable materials, and a wide range of sizes to accommodate various vehicles.

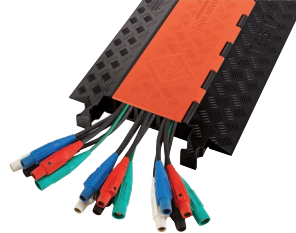

Loading Dock Plates and Ramps

Loading docks are high-traffic areas where safety and efficiency are paramount. Dock plates and ramps provide a smooth transition for wheeled equipment, reducing tripping hazards. High-visibility HDPE dock plates offer durability, superior grip, and easy maneuverability. With a 750 lb capacity and compatibility with various equipment, these lightweight plates enhance worker safety and streamline loading operations.

Cable Protectors

Cable protectors are crucial in control rooms, staff break rooms and other operational areas amenities where cables are present and where there is traffic of people and/or vehicles. They safeguard cables from damage and prevent tripping hazards while ensuring compliance with regulations such as OSHA. Cable protectors are easy to install and can withstand harsh conditions and wear and tear, lowering total cost of ownership.

Stage, Backstage & Tech Areas

Proper organization prevents hazards. Cable management reduces tripping risks, anti-fatigue mats improve safety, and backstage storage keeps equipment organized. A structured tech area ensures smooth sound and lighting operations, while clear pathways enhance performance flow and equipment transport.

Type 2 Indoor Explosive Magazines

Type 2 Indoor Explosive Magazines built to comply with ATF regulations for low explosives including flash trays, strobe pots, smoke cartridges, flame mortars, display fireworks and other pyrotechnic-driven effects. Meets or exceeds ATF 27 CFR, Part 555.208. Avoid pyrotechnic accidents with safe, code compliant storage. On wheels for easy mobility.

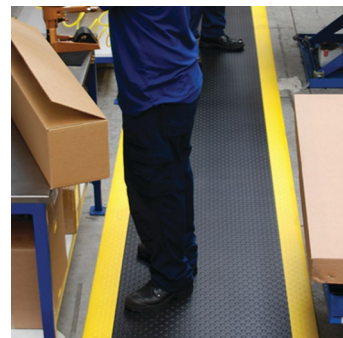

Type 3 Daybox Explosive Magazine

Type 3 Daybox Explosive Magazine built to meet ATF regulations for the safe, temporary storage and transport of small quantities of explosives. Intended for same-day use of low or high explosives such as airbursts, ice fountains, comets, flash cotton, display fireworks, and other pyrotechnic-driven effects.

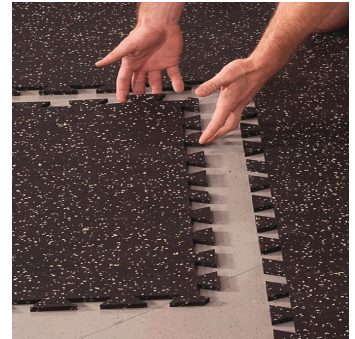

Anti-Fatigue Mats

Sof-Tred™ is a lightweight PVC foam mat available in single station or long rolls for safe walkways and standing comfort backstage, storage and work areas.

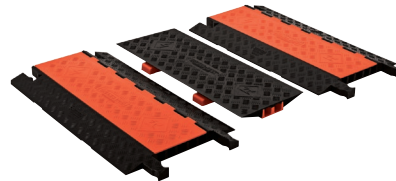

Floor Protector Tiles

Shock & slip resistant floor protector tiles allow you to protect areas from slip and falls while also reducing sound in backstage environments and protecting the floor from drops of heavy items.

Cable Protectors

Cable protectors are essential in stage, backstage, and tech areas due to the high volume of cables and foot traffic. They help prevent damage to cables, reduce tripping hazards, and ensure a safer, more organized environment for performers, crew, and equipment while ensuring compliance with regulations such as OSHA. Cable protectors are easy to install and can withstand harsh conditions and wear and tear, lowering total cost of ownership.

Emergency Cabinets

Emergency cabinets provide protected, quick access to emergency supplies during an event, ensuring safety in high-risk entertainment venues like theaters, concert halls, and arenas. With features like GloAlert™ labels for visibility in power outages, secure latching systems, and compliance with NFPA and OSHA standards, they protect backstage and technical areas while enabling quick access during emergencies.

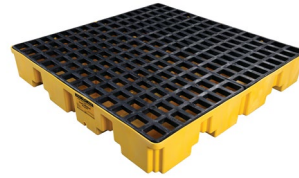

Safety Cans

Safety cans provide a dependable solution for managing flammable liquids in backstage and technical areas of theaters, concert halls, and arenas. With 24-gauge galvanized steel construction, leak-proof design, and compliance with OSHA and NFPA standards, they ensure fire safety, prevent spills, and protect performers and crew in high-risk environments.

Spill Containment

Hazardous liquids like fog and haze fluids, oil-based paints, spray adhesives, cleaning solvents, hydraulic oils, and fuels for generators or flame effects are commonly used backstage. Spill pallets offer a secure, EPA-compliant solution for storing these materials, helping prevent leaks that could harm crew, damage equipment, or disrupt performances. Their chemical-resistant HDPE construction and forklift compatibility make them ideal for fast-paced, safety-focused environments.

Lithium-Ion Cabinet

Lithium-ion battery charging cabinet offers unparalleled safety for entertainment industry control rooms, break rooms, and storage areas. With ChargeGuard™ technology, multiple protective layers, and a 4kWh capacity, it mitigates fire risks and thermal events. Its compact design, lockable doors, and easy relocation ensure secure, efficient battery management, enhancing workplace safety and operational continuity.

Food and Beverage Areas

Concession stands, restaurants, and bars must manage fire hazards and spills while meeting OSHA, NFPA, and EPA regulations. OSHA violations can result in serious penalties. Our solutions, including flammable cabinets, spill containment pallets, and food service mats, enhance compliance and safety.

Food Service Mats

T18 SuperFlow mats offer anti-fatigue comfort and slip resistance in a low profile mat for standing workers in food service applications. Available in rubber for wet or dry areas or nitrile for greasy/oily areas.

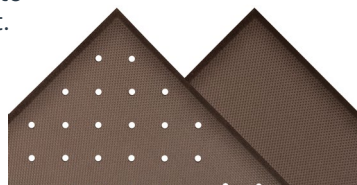

Walkway Mats

130 Sabre is a non-textured, absorbent mat that creates safe walkways in areas where spills may occur such as beverage stations, near server stations and in food service walkways.

Food Service Mats

T17 is a lightweight yet durable nitrile foam mat for food service applications and areas where workers stand for long periods of time. Closed cell nitrile makes it resistant to grease and oils and is our most comfortable standing mat.

Wheel Chocks

In food and beverage areas, wheel chocks secure food trucks and other vehicles reducing the risk of injury, damage, or disruption. Wheel chocks feature lightweight designs, easy installation, and durable materials such as high-density polyethylene, offering a wide range of sizes to accommodate various vehicles. They are built to endure harsh conditions, minimizing the need for frequent replacements and ensuring long-lasting, reliable performance.

Cable Protectors

Cable protectors are paramount in food and beverage areas such as food courts, concession stands and mobile vendor areas. They safeguard cables, such as ones used in generator power cables, from damage and prevent tripping hazards in these high-traffic areas while ensuring compliance with regulations such as OSHA. Cable protectors are easy to install and can withstand harsh conditions and wear and tear, lowering total cost of ownership. Customization is also available to safeguard your assets.

Flammable Cabinets

Flammable cabinets provide essential fire protection and compliance for the entertainment industry. Ideal for food courts, cafeterias, concession stands, mobile vendors, and bars, these cabinets ensure safe storage of flammable liquids with robust steel construction, leakproof sumps, and self-latching doors. Enhance safety, prevent hazards, and meet OSHA/NFPA standards effortlessly.

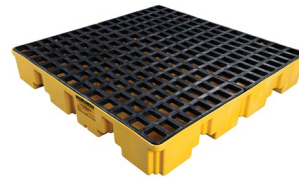

Safety Cans

Safety cans provide secure, OSHA-compliant storage and dispensing solutions for flammable liquids, ensuring fire prevention and operational safety. Ideal for food courts, concession stands, mobile vendors, and bars, these cans minimize risks while enhancing efficiency with features like leakproof lids, flame arrestors, and controlled pouring. Protect your business and customers seamlessly.

Spill Containment

Spill containment pallets are crucial for maintaining safety and compliance in food and beverage areas for entertainment venues. These durable, EPA-compliant pallets store cleaning chemicals, sanitizers, cooking oils, and other liquids, preventing spills that could create slip hazards or contaminate food zones. Made from chemical-resistant high-density polyethylene (HDPE), they are forklift-compatible and feature removable grates for easy cleaning, supporting efficient workflows in high-traffic, fast-paced environments.

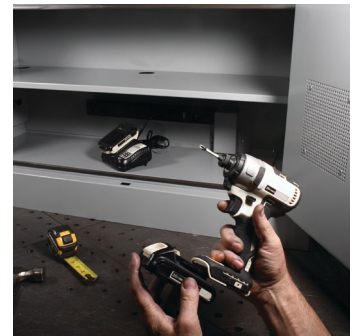

Oily Waste Cans

Oily waste cans provide a vital safety solution for the entertainment industry. These durable steel cans prevent fires by isolating flammable waste, limiting oxygen exposure, and ensuring compliance with safety regulations. Protect your facilities while maintaining efficiency and environmental responsibility.

Lithium-Ion Cabinet

Lithium-ion battery charging cabinet offers unparalleled safety for entertainment industry control rooms, break rooms, and storage areas. With ChargeGuard™ technology, multiple protective layers, and a 4kWh capacity, it mitigates fire risks and thermal events. Its compact design, lockable doors, and easy relocation ensure secure, efficient battery management, enhancing workplace safety and operational continuity.

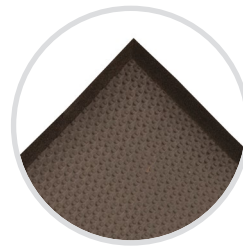

Amenities

High-traffic areas like restrooms, merchandise booths, and ATMs pose slip and accessibility risks. Slips cause 20% of workplace injuries, and ADA violations carry fines up to \$55,000. Barriers, fire extinguishers, anti-fatigue mats, and cable protectors enhance safety and compliance.

Anti-Fatigue Mats

Workers in maintenance areas, such as those managing equipment or performing facility upkeep, often stand for extended periods. Anti-fatigue mats support comfort and reduce fatigue, helping them stay alert and productive while on the job.

Cable Protectors

Cable protectors are needed to protect cables used in information desks, booths, and other amenities and high-traffic areas. They safeguard cables from damage and prevent tripping hazards while ensuring compliance with regulations such as OSHA. Cable protectors are easy to install and can withstand harsh conditions and wear and tear, lowering total cost of ownership. Customization is also available to safeguard your assets.

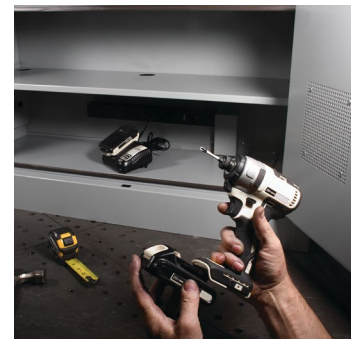

Ground Protection

Ground protection mats are designed to protect surfaces from damage caused by heavy foot traffic and which are present in amenities such as booths, information desks, etc. Made from 100% recycled high-density polyethylene, they are designed to withstand heavy foot and vehicle traffic. They protect surfaces and ensure safety. Easy to install and maintain, these mats are perfect for temporary pathways and event logistics, offering cost-effective, reliable protection.

Lithium-Ion Cabinet

Lithium-ion battery charging cabinet offers unparalleled safety for entertainment industry control rooms, break rooms, and storage areas. With ChargeGuard™ technology, multiple protective layers, and a 4kWh capacity, it mitigates fire risks and thermal events. Its compact design, lockable doors, and easy relocation ensure secure, efficient battery management, enhancing workplace safety and operational continuity.

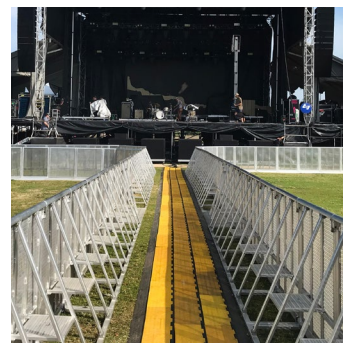

Outdoor Venues & Theme Parks

Stadiums, amphitheaters, fairgrounds, and race tracks face risks like mechanical failures, weather hazards, and guest negligence. Compliance with safety codes prevents costly fines. With 30,000 amusement park-related injuries reported annually, inspections, training, and safety products enhance visitor safety.

Cable Protectors

Cable protectors are essential in outdoor venues and theme parks, offering durability and safety in high-traffic areas. They safeguard cables from damage and prevent tripping hazards while ensuring compliance with regulations such as OSHA. Our vast offering of cable protectors are easy to install and can withstand harsh conditions and wear and tear, lowering total cost of ownership. Customization is also available to safeguard your assets.

Wheel Chocks

In outdoor venues and theme parks, wheel chocks secure transport vehicles, trailers, and equipment, reducing the risk of injury, damage, or disruption. Wheel chocks feature lightweight designs, easy installation, and durable materials such as high-density polyethylene, offering a wide range of sizes to accommodate various vehicles. They are built to endure harsh conditions, minimizing the need for frequent replacements and ensuring long-lasting, reliable performance.

Ground Protection Matting

Whether you need to protect sensitive turf or provide extra traction, Mats are a great solution for outdoor venues. Featuring a flat tread design that is easy to walk on, it virtually eliminates ground restoration costs from pedestrian or vehicle damage. They are easy to handle, and can be locked together with Turn-A-Links forming a continuous roadway. Translucent material is available to allow sunlight to reach grass.

Noise Barriers

Noise barriers mitigate noise pollution in outdoor venues and theme parks, protecting both employees and guests. Easy to install on fencing or scaffolding, these water-resistant and fire-resistant barriers reduce noise from construction or loud equipment by up to 50%. They address challenges of noise intrusion into commercial or residential areas, ensuring a more pleasant environment.

Spill Control Berms

Spill containment berms are essential for outdoor venues and theme parks using temporary power, special effects, and heavy equipment. They provide reliable containment for diesel generators powering stage lighting and sound, as well as hydraulic or oil-powered equipment like boom and stage lifts. They also manage the risk of fuel or chemical spills from pyrotechnics, fog machines, and special effects gear, ensure regulatory compliance, and keep high-traffic areas safe during events.

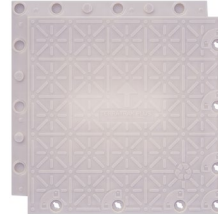

Outdoor Ashtrays

Outdoor ashtrays provide a durable, fire-safe solution for cigarette disposal, reducing litter and fire risks while enhancing the cleanliness and aesthetics of outdoor spaces. Featuring self-extinguishing designs, weather-resistant materials, and easy maintenance, these ashtrays promote environmental responsibility and compliance with safety standards, making them ideal for industrial, commercial, and public settings.

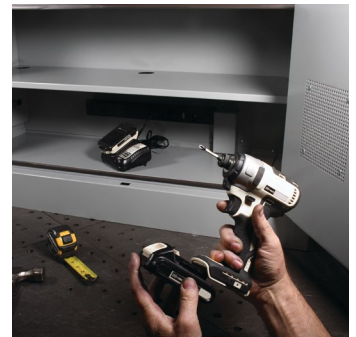

Drivable Turf Protection Panels

Drivable turf protection panels safeguard turf surfaces from heavy vehicle traffic, ensuring durability and minimizing damage. Ideal for outdoor events, these panels provide a stable and secure surface for vehicles while protecting the underlying turf.

Lithium-Ion Cabinet

Lithium-Ion battery charging cabinet offers unparalleled safety for entertainment industry control rooms, break rooms, mobile, outdoor venues and storage areas. With ChargeGuard™ technology, multiple protective layers, and a 4kWh capacity, it mitigates fire risks and thermal events. Its compact design, lockable doors, and easy relocation ensure secure, efficient battery management, enhancing workplace safety and operational continuity.

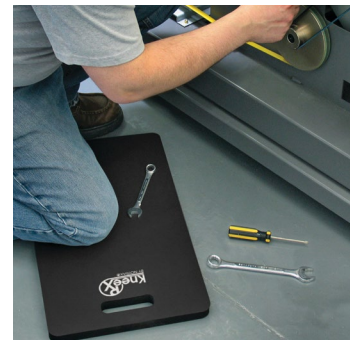

Maintenance

Routine inspections prevent fires and carbon monoxide leaks, ensure OSHA compliance, and help avoid fines. Organized storage and ventilation prevent accidents. Proper cable management, ground protection, and durable turf systems maintain venue safety and preserve event spaces.

Kneeling Pads

KneeRx is a lightweight, portable solution for safe and comfortable working where kneeling on the ground is required.

Cable Protectors

Cable protectors safeguard cables from damage and prevent tripping hazards while ensuring compliance with regulations. They are an important part of maintenance operations where cables are used, such as dedicated spaces for fixing equipment and stages. Our vast offering of cable protectors are easy to install and can withstand harsh conditions and wear and tear, lowering the total cost of ownership.

Wheel Chocks

Wheel chocks ensure safety by preventing vehicle movement, reducing risks of damage and injury. Wheel chocks are lightweight, durable, and easy to install. Wheel chocks secure vehicles during preventive inspections, repairs, and stage upkeep. They prevent accidental movement, ensuring safe access to equipment and systems like HVAC or electrical. This enhances safety and efficiency, supporting smooth operations during repairs and restoration tasks.

Oily Waste Cans

Oily waste cans provide a vital safety solution for the entertainment industry. Ideal for loading docks, control rooms, break rooms, and storage areas, these durable steel cans prevent fires by isolating flammable waste, limiting oxygen exposure, and ensuring compliance with safety regulations. Protect your facilities while maintaining efficiency and environmental responsibility.

Flammable Cabinets

Flammable cabinets offer the entertainment industry a reliable solution for safe storage of flammable materials. Ideal for loading docks, central control rooms, staff facilities, and storage areas, these cabinets ensure OSHA and NFPA compliance, minimize fire risks, and protect personnel and assets with durable, secure, and space-efficient designs.

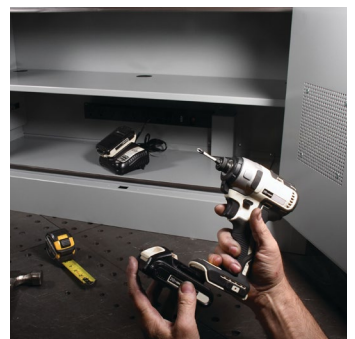

Gas Cylinder Storage

Flammable gas cylinder storage solutions provide the entertainment industry with OSHA- and NFPA-compliant safety for loading docks, control rooms, break areas, and storage spaces. Durable, rust-proof aluminum construction ensures secure, ventilated storage for flammable gases, protecting personnel and equipment while optimizing compliance and operational efficiency in high-risk environments.

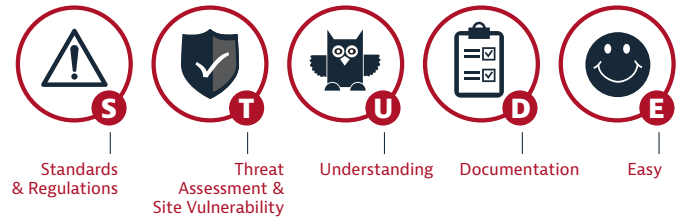

Lithium-Ion Cabinet

Lithium-ion battery charging cabinet offers unparalleled safety for entertainment industry control rooms, break rooms, and storage areas. With ChargeGuard™ technology, multiple protective layers, and a 4kWh capacity, it mitigates fire risks and thermal events. Its compact design, lockable doors, and easy relocation ensure secure, efficient battery management, enhancing workplace safety and operational continuity.

STUD-E™

The Ultimate Workplace Safety Survey

Special Offer!

Enhance Safety with a Complimentary STUD-E™ Site Assessment

Ensure your entertainment venue is safe and compliant with our FREE STUD-E™ Site Assessment. A Justrite safety expert will visit your facility to identify potential hazards and provide tailored solutions to mitigate risks.

Request a FREE Justrite Safety Group Risk Assessment Survey (\$5,000 market value), courtesy of your preferred local distributor.

Contact your local rep for more information today.

STUD-E™ prioritizes critical safety issues while helping to balance the bottom line.

- ✓ Preventing compliance violations from OSHA, NFPA, EPA and FDA
- ✓ Avoiding costly fines
- ✓ Preventing workers comp claims
- ✓ Lowering insurance premiums
- ✓ Enhancing process improvements

Our expertise is your advantage. We collect, synthesize, and distribute safety information — in an easy-to-use report — so you can take action to remain safe and compliant.

Can you spot the numerous safety problems in this picture? If not, we can help.

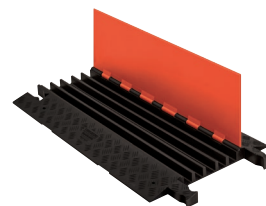

Global Leader in Entertainment Safety

Proudly Offered By:

Justrite Safety Group is a leading global manufacturer and supplier of a deep portfolio of complementary mission-critical safety products which simplify workplace safety and regulatory compliance to protect lives, assets, and the environment.

Entertainment venues face unique safety challenges in a dynamic environment. We innovate advanced solutions to address evolving risks and uphold safety standards. Our products provide tailored answers for diverse venues, enhancing crowd management, emergency response, and ensuring fire safety.
