

DOWNSTREAM OIL & GAS INDUSTRY

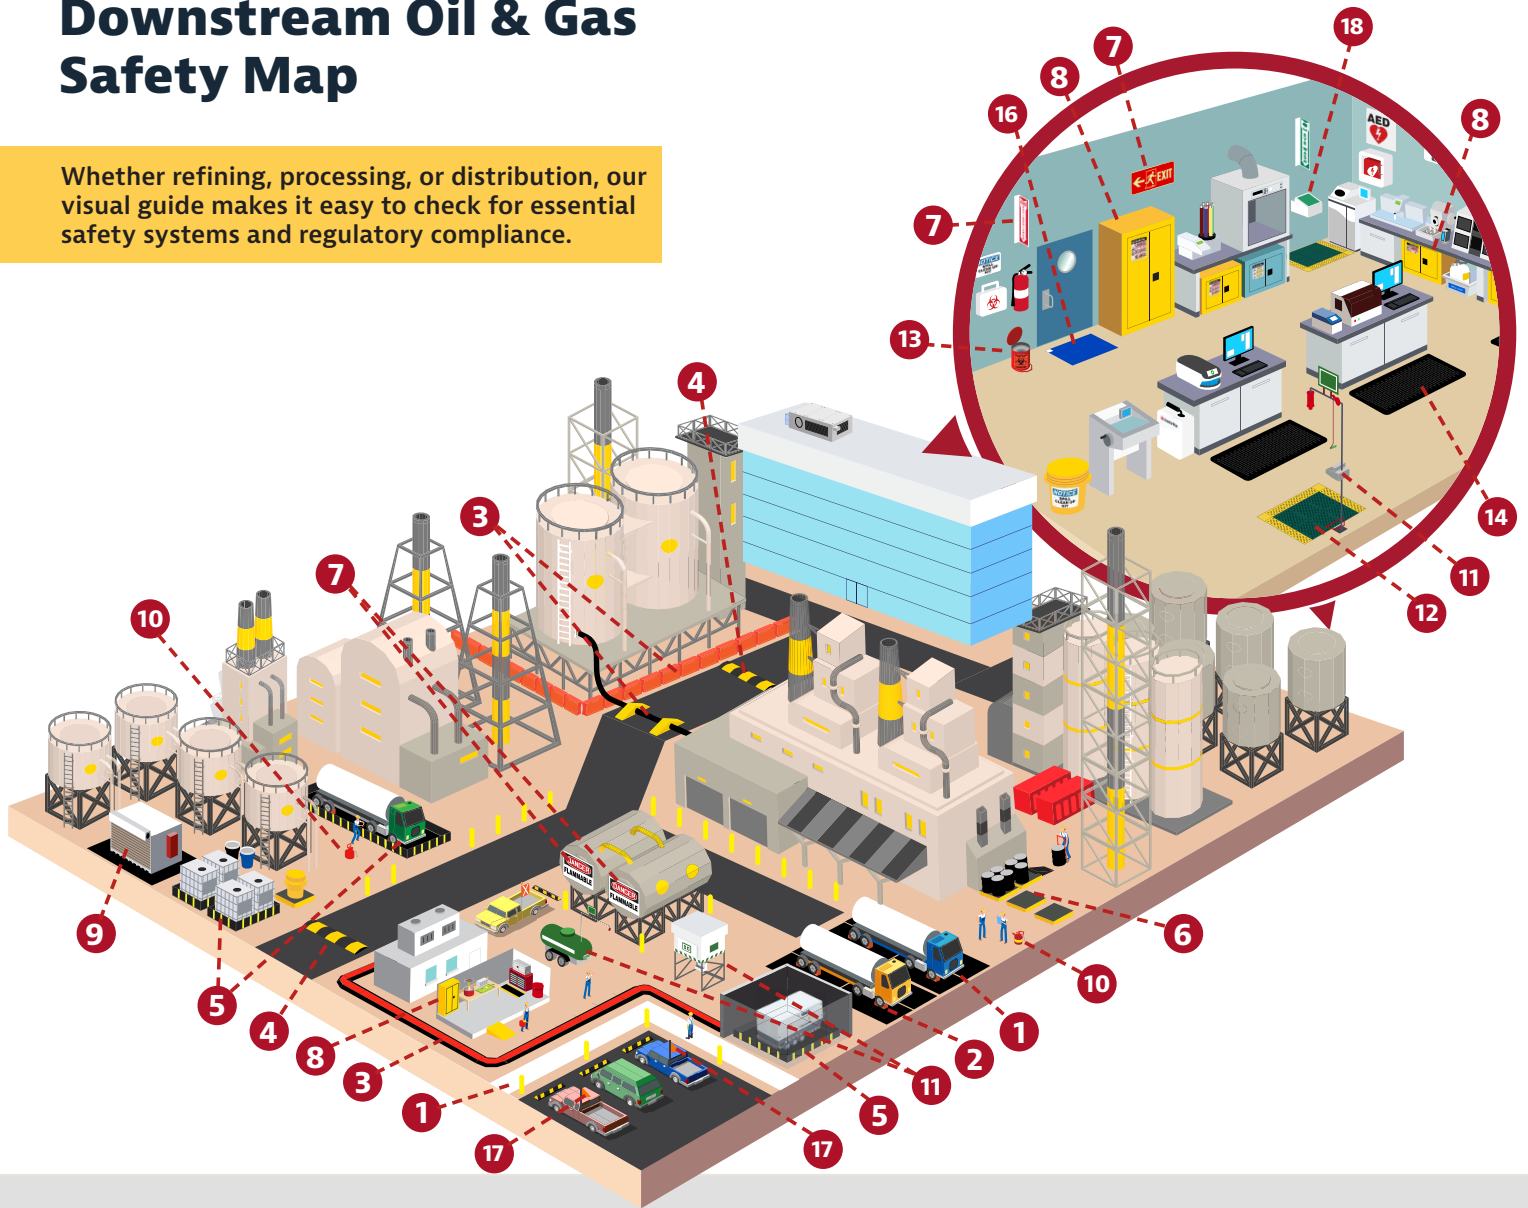

volume 1.0

**Comprehensive Safety Solutions for
Refining, Processing, and Distribution**

Downstream Oil & Gas Safety Map

Whether refining, processing, or distribution, our visual guide makes it easy to check for essential safety systems and regulatory compliance.

- | | | |
|--|---|---|
| <p>1 Ground Protection Mats
Protects ground, supports heavy equipment, and prevents site damage.</p> <p>2 Wheel Chocks
Prevents vehicle movement during oil field loading operations.</p> <p>3 Cable & Hose Protectors
Shields cables from damage and prevents tripping hazards.</p> <p>4 Speed Bumps
Reduces vehicle speed for safety in traffic areas.</p> <p>5 Spill Containment Berms
Temporary barriers for containing hazardous liquid spills.</p> <p>6 Spill Containment Pallets
Elevated platforms to capture leaks from containers.</p> | <p>7 Safety Signs
Displays warnings and important safety information.</p> <p>8 Flammable Cabinets
Stores flammable liquids safely and securely.</p> <p>9 Fire Rated Building
Structure designed to withstand fire for safety.</p> <p>10 Safety Cans
Dispenses and stores hazardous liquids safely.</p> <p>11 Emergency Safety Showers
Provides immediate decontamination for chemical exposure.</p> <p>12 Eye Wash Mats
Bright yellow/green mats mark eye wash and safety shower locations.</p> | <p>13 Oily Waste Cans
Safely stores oily rags and waste materials.</p> <p>14 Lab Anti-Fatigue Mats
Reduces fatigue for workers standing in labs.</p> <p>15 Gas Cylinder Racks
Securely stores gas cylinders upright, preventing tipping and damage.</p> <p>16 Tacky Mat
Remove and contain dirt and dust from foot traffic and equipment wheels.</p> <p>17 Warning Whips
Alerts workers to vehicles with bright, flexible whip.</p> <p>18 Eye Wash Stations
Safe and compliant eye washes for chemical emergencies.</p> |
|--|---|---|

FIRE SAFETY

Fire safety is paramount in downstream oil and gas operations where flammable materials are processed and stored. Advanced safeguards are vital to prevent fires, explosions, and major operational and environmental losses.

Flammable Safety Cabinets

OSHA and NFPA 30 require approved cabinets for over 25 gallons indoors. Justrite fire-resistant cabinets meet OSHA, NFPA 30, and IFC standards (self-closing), and last up to three times longer than competitors, reducing replacement costs.

Outdoor Flammable Safety Cabinets

Weather-resistant, secure storage for flammable liquids. Ideal for outdoor use. Comply with OSHA, NFPA 30, and IFC (self-closing models).

Fire Rated Buildings

Engineered to store flammable chemicals safely, fire-rated buildings reduce fire and explosion risks while ensuring regulatory compliance.

Lithium-Ion Battery Charging Cabinet

Most lithium-ion battery fires happen during charging. The Justrite cabinet features a 9-layer ChargeGuard™ system, pressure relief vent, double-wall insulation, and a filtration system to help reduce risk and contain hazards.

While regulatory codes do not mandate the specific color for a flammable safety cabinet, industry has customarily observed certain colors for defined liquids.

Yellow for flammable liquids	Green for pesticides and insecticides
Red for paints, inks, and other combustible liquids	Silver or neutral colors for laboratory settings
Blue for corrosives and hazardous liquids	White, beige or gray for waste or outdoor lockers

Safety Cans and Containers

When working with flammable or combustible liquids, using the wrong fluid could result in equipment damage or lead to disaster. Storing fuels and flammable chemicals in different colored safety cans help identify, organize, and segregate liquids.

OSHA requires flammables with a flash point below 80°F (27C) be in a red can with yellow band. Typical industry convention is:

Red for Gasoline	Yellow for Diesel	Green for Oil	Blue for Kerosene
-------------------------	--------------------------	----------------------	--------------------------

Type I with Funnel

Type II with Metal Hose

AccuformNMC Laser Line Projector, Green	LLP240L	—
AccuformNMC Laser Line Projector, Red	LLP110L	—

MATERIAL HANDLING

Reliable material handling solutions—built to safely transport and manage heavy loads in harsh, high-risk environments.

Plastic Overpack Drums

Large secondary containers for safely enclosing leaking or damaged drums. DOT-compliant.

Product Description	SKU	CA Prop 65
Eagle 95 gal Overpack Plastic Drum Barrel	1690	—
Eagle 65 gal Overpack Plastic Drum Barrel	1661	—

Drum Dollies

Filled drums are heavy. Avoid injuries with accessories that make moving and repositioning drums easier.

Product Description	SKU	CA Prop 65
Eagle 55 gal Drum Cradle Cart	08800	—
Eagle Drum Cart with Strap	1952	—
Justrite Steel Cross-Brace Drum Dolly for Single Drums	28270	—

SECONDARY SPILL CONTAINMENT

Engineered to contain leaks and spills from tanks, generators, or equipment, these berms provide best-in-class protection—preventing hazardous liquids from contaminating soil or water and ensuring full regulatory compliance. Their seamless, leakproof construction enables rapid deployment and delivers unmatched durability compared to standard options.

Rigid-Lock QuickBerm®

One-piece containment berm meets EPA requirements and controls leaks from drums, vehicles, and tankers. No assembly needed — ideal for quick, drive-in/drive-out use (not for long-term storage). Deploys in minutes for instant, reliable containment.

Product Description	SKU	CA Prop 65
Justrite 10' x 10' x 12", 745 gal, Drive Over Berm	28519	▲
Justrite 6' x 8' x 12", 355 gal, Drive Over Berm	28516	▲
Justrite 4' x 8' x 12", 235 gal, Drive Over Berm	28514	▲
