

Healthcare Safety Solutions

Essential Solutions for Workplace Safety

Supporting Safer Healthcare Environments

Justrite Safety Group is committed to helping healthcare organizations create safer, more compliant environments of care. With a broad portfolio of safety solutions and U.S.-based manufacturing, we deliver products designed to meet the unique demands of hospitals, clinics, and healthcare facilities. Whether you're enhancing compliance, reducing workplace risk, or preparing for a Joint Commission survey, we're ready to support your safety and performance goals across all care settings.

Maintain Compliance with Evolving Standards

As regulations and accreditation expectations evolve, proactive risk identification is essential. The Justrite® STUD-ETM Workplace Safety Survey is a consultative, confidential facility assessment designed to help healthcare organizations address physical environment risks, support compliance with standards from The Joint Commission, CMS (Centers for Medicare & Medicaid Services), DNV, and other accrediting bodies, and strengthen ongoing safety and risk management strategies.

Products Designed with Regulatory Standards in Mind

Justrite Safety Group is recognized globally for its quality and its ability to support compliance with Joint Commission Environment of Care, Life Safety, and Emergency Management standards, as well as requirements set forth by CMS (Centers for Medicare & Medicaid Services), DNV, and other accrediting bodies.

STUD-E™

The Ultimate Workplace Safety Survey

Keeping workers safe is more than PPE—it starts with recognizing risks. The Justrite® STUD-E™ Safety Survey helps healthcare facilities meet standards from The Joint Commission, CMS (Centers for Medicare & Medicaid Services), DNV, and other accrediting bodies by identifying Environment of Care hazards, supporting compliance, and promoting safety for staff, patients, and visitors.

Using our *proprietary, custom-built app* designed by safety engineering experts, STUD-E™ covers three general areas:

1 Storing and Transferring Flammable Liquids

- Slips, trips, and falls
- Spill control and containment
- Hazardous materials and waste management
- Emergency safety equipment
- Signage and hazard communication
- Ergonomic risk reduction
- Parking area and exterior safety

2 Assess Risk

- Determine sources and processes causing risk
- Evaluate existing control measures
- Actions needed to control the risk
- Severity level
- Urgency of the risk
- Prioritization of risks

3 Control

- Help eliminate or minimize risk
- Substitute hazard with safer alternative
- Recommend engineering controls
- Administrative controls
- 5S Lean
- Process improvement

Put our expertise to work and improve your overall safety program
