ESSENTIAL SAFETY SOLUTIONS FOR REFINERY OPERATIONS

**Protect your Refineries with Justrite and Eagle
Manufacturing's Trusted Solutions for
Hazardous Material Management**

Refineries are experiencing growth due to strong global demand. By 2025, oil consumption is projected to increase by 0.9 million barrels per day, with the International Energy Agency forecasting demand to exceed 103 million barrels daily this year.

The US leads in the growth from both new drilling and enhancements in productivity, with barrels produced per foot of drilling more than doubling since 2014. As technology and infrastructure continue to improve, further growth and innovation in the sector are expected.

Justrite and Eagle provide comprehensive safety solutions designed for refineries, enabling safety managers to easily implement essential safety practices. By integrating products—such as safety cans, storage cabinets, and spill containment systems—you can enhance safety, ensure compliance, and achieve operational excellence throughout every phase of your refinery operations.

 <p>1 Outdoor Flammable Cabinets Available in 30, 45, 60, 90-gallon capacities</p>	 <p>2 Plastic Protective Parking Stops Available in 3 colors</p> 	 <p>3 Rigid Lock QuickBerm® Available in different sizes</p>	 <p>4 Plastic Bollard Posts and Covers Available in different colors & sizes</p> 
 <p>5 Plastic Drums Available in different colors & capacities</p> 	 <p>6 Flammable Cabinets Available in different capacities</p>	 <p>7 Lithium-Ion Battery Cabinet Model number: 231703</p>	 <p>8 Plastic Overpack Drums Available in different capacities</p> 
 <p>9 Emergency Safety Showers Available in different models</p>	 <p>10 Spill Containment Pallets Available in different colors & sizes</p> 	 <p>11 Safety Cans Available in different colors & capacities</p>	 <p>12 Oily Waste Cans Available in different colors & capacities</p>

Key Product Categories:

- **Safety Cans & Containers:** Store and transfer flammable liquids safely; available in Type I & II with self-closing lids and vented designs, meeting OSHA and NFPA standards.
- **Oily Waste Cans:** Fire-safe disposal of oil-soaked rags and combustibles, reducing fire risk; available in durable HDPE or metal.
- **Flammable Safety Cabinets:** Secure, compliant storage for hazardous materials, in various sizes for indoor/outdoor use, meeting OSHA and NFPA 30.
- **Spill & Secondary Containment:** Includes pallets and overpacks to control leaks and spills, ensuring EPA compliance and environmental safety.
- **Safety Showers & Eyewashes:** ANSI-approved emergency stations for chemical exposure in industrial settings.
- **Poly Drum Poly Overpacks:** DOT-compliant containers for safe transport of hazardous materials.
