

The ORIGINAL Ground Protection Mats

Don't be fooled by knock-offs!

VersaMAT[®] Ground Protection Mats

- Highest load bearing capacity on the market, suitable for both heavy equipment and pedestrians—ideal for scissor lifts, wheelbarrows, parking lots, even skid steers
- Low-profile pedestrian-friendly tread
- Protect grass and soft or sensitive ground from damage

Multifunction mat ideal for both heavy equipment and pedestrians—use with wheelbarrows, parking lots, walking paths, and more

VersaMAT features a low-profile, slip-resistant tread surface on the top side with two tread options for the bottom side—the more aggressive AlturnaMATS® diamond plate tread for maximum traction, or a smooth surface for hard surface protection. With an industry-leading load bearing capacity of 120 tons*, VersaMAT can also be used as a vehicle track way, parking area, or staging area for supplies and equipment.

Manufactured from 100% recycled high-density polyethylene, VersaMAT is durable and weather-resistant. The flexible construction follows the contours of the ground, delivering a highly effective access solution on sloping or undulating ground conditions. Mats are lightweight, easily deployed by hand, and are available with optional hand holes.

- Low-profile tread ideal for pedestrian applications
- Keep equipment from getting stuck, even in soft conditions
- Prevent damage and leave turf smooth—mats disperse weight evenly to prevent soil compaction or ruts
- Connect together to build a roadway or working platform in minutes—use accessory connectors to ensure a firm and secure trackway
- Mat-Pak bundles are available, offering a complete, convenient package ready to load onto your truck bed—includes 12 mats, 20 single Turn-A-Links, 2 Handi-Hooks, 2 ratchet straps and a metal skid rack
- Limited lifetime warranty

Made in the USA
 With US & imported parts

Load capacity*	120 tons (240,000 lb; 108,862 kg)
Surface tread	Two standard options: 1) Flat oval / aggressive diamond cleat or 2) Flat oval / smooth
Material	100% recycled high-density polyethylene (HDPE)
Thickness	0.5 in (1.27 cm)
Color options	Black or Clear

*Load bearing capacity is subject to ground conditions. Sizing is subject to a manufacturing variance of +/- 5%.

Clear Mats: the Clear Choice for Healthy Lawns

Clear mats are translucent to let the sun shine through preventing browning of grass—ideal for golf courses, resorts, homes and cemeteries.

Effects after 5 days: (left to right: clear mat, white mat, black mat)

Black mats show heavy browning of grass & burnt leaves.
 White mats show moderate browning & slightly burnt leaves.
 Clear mats show no damage.

White mats not available.
