Turnaround Safety Solutions

Essential safety solutions to help manage turnarounds safely

Scheduled maintenance shutdowns allow for inspection of equipment that would be impossible to do while the equipment is running or while tanks and vessels are full. A turnaround should result in returning to peak performance levels when production restarts. As a significant part of a plant's yearly maintenance budget, turnarounds can impact the bottom line if not planned properly. Justrite Safety Group offers a collection of product solutions to help ensure safety during shutdowns.

Safety Identification

Safety Tags

Pliable poly-tags are tear and water resistant. Measures 5-3/4" x 3-1/4" with 3/8" top hole.

Essential Safety Solutions

Safety Cans

Protect workers and reduce the risk of fire and explosion when pouring and storing flammable liquids. Use to refuel generators during turnaround or heavy-equipment at ground level, transport gasoline for small engine and road vehicles, and store flammable liquids in maintenance areas.

- 6AW03 Justrite Type I Safety Can, 5 gallon, red
- 5HE22 Justrite Type I Safety Can, 5 gallon, yellow
- 3AG33 Funnel For Justrite Type I Safety Cans

Spill Containment

Be prepared for accidental leaks and spills. Quickly contain spills and leaks during temporary storage of drums, machine parts, batteries, and equipment.

- 32XU06 Rigid-Lock QuickBerm[®], 10 x 20 ft **▲†**
- 28362* Ground Mat, 6 x 56 ft
- 32XU41 Maintenance Spill Berm, 10 x 11 ft **▲†**
- 32XU62 Pop-Up Pool, 62" dia x 16"H **▲**

Emergency Safety Showers & Eyewashes

Critical for emergency response, self-contained showers and eye wash stations don't require plumbing—ideal for shutdowns.
